PETEX CATALOG
INSTRUCTOR-LED TRAINING | PUBLICATIONS AND VIDEOS | E-LEARNING | CUSTOM COURSES

Training the Energy Industry Since 1944
In our 75 years as a leader in education, training programs, and talent development resources for the oil and gas industry, PETEX has experienced and is accustomed to ongoing, changing market conditions and workforce demands. As part of The University of Texas at Austin and the Cockrell School of Engineering, our number one priority is supplying our learners and education providers with top-tier educational resources while administering lifelong education support to learners in all phases of their lives. We understand and appreciate that not all educational journeys look the same, and we pride ourselves on being able to provide various options to help learners achieve success.

Since 1944, we have provided the oil and gas industry with professional development opportunities and educational materials that include a vast portfolio of custom on-site courses, certificate programs, instructor-led training, self-directed e-learning, videos, and publications. We invite you to explore our catalog to see how we can help take your career or enterprise to the next level.

All companies are unique. Customize your workforce training to reflect your company’s needs. PETEX can tailor any of our current online or instructor-led courses, modules, or certificate programs to your company’s requirements or even design a course from scratch! With limitless options, we are confident that we can build a quality, efficient, and reusable training resource for your employees. For more information see petex.utexas.edu/courses/custom-courses.

The University of Texas at Austin
Petroleum Extension (PETEX®)
Cockrell School of Engineering
PETEX published the definitive guide to rotary drilling nearly 70 years ago. Since then, the oil and gas industry has changed dramatically. The rugged tools that are used for drilling are now steered by smart technology and state-of-the-art devices. Safe working conditions and initiatives to protect the environment are mandated by government regulations and company rules, and drilling now often occurs in remote locations under extreme conditions.

As the O&G industry continues to advance, so do we. Today at PETEX, a team of highly-skilled instructional designers and content development specialists are working closely with O&G experts to design highly innovative learning tools that support the professionals, small businesses, and large corporations that comprise the upstream, midstream, and downstream sectors. Each year, we host dozens of courses on the topics that matter most to you at our training centers in Houston and Odessa, Texas, and we’re constantly researching new ways to serve the industry.

We invite you to look through this year’s catalog to discover how we can help you achieve your career or company goals. As you will see, we offer an array of learning tools and services for prospective, entry-level, and skilled professionals in each sector of the industry:

**Upstream.** Exploration, land management, drilling, completion, well stimulation, production, and workover/intervention

**Midstream and Downstream.** Pipeline, transportation, storage, refining, and infrastructure maintenance

No matter your area of expertise, PETEX has a learning solution for you.

**LEARNING TOOLS AND SERVICES**

Choose from a variety of learning tools and services that fit your schedule and learning style. Individual and enterprise solutions are available.

**Certificate Programs.** Enroll in one of our instructor-led training courses, or select a qualified e-learning program to earn a professional certificate and continuing education units (CEUs) from The University of Texas at Austin–PETEX. See page 7 for more information.

**Instructor-Led Training.** We offer short-term classes, both online and in-person, throughout the year that combine interactive lectures from subject matter experts with lab work and immersive field trips through virtual and physical modalities. Earn a certificate of completion plus CEUs while broadening your professional network. See page 10 for more information.

**E-Learning.** Earn professional CEUs on the go with select e-learning programs, which assess your understanding of O&G topics and procedures through engaging online activities, or earn a certificate of completion from UT Austin by successfully completing our e-learning modules. See page 21 for more information.

**Videos.** Our collection of videos covers a wide-range of industry topics, including onshore and offshore drilling and production. See page 29 for more information.

**Publications.** Expand your professional library with our extensive line of print and e-books. Our recent releases are filled with dozens of color photos and illustrations, review questions, and glossaries for quick referencing. See page 35 for more information.

**Custom Programs.** We can customize many of our learning solutions to better serve your enterprise. Our learning specialists can work with you to align our products to your brand or build an entirely new competency-based program from scratch. Send your inquiries in an email to info@petex.utexas.edu to learn more.

**VOLUME DISCOUNTS**

**Learning Tools**

For discounts on learning certificate programs, e-books, or technology-enhanced learning programs, see the table below.

<table>
<thead>
<tr>
<th>Number of Licensed Users</th>
<th>3 to 10</th>
<th>11 to 20</th>
<th>21 to 50</th>
<th>51 to 99</th>
</tr>
</thead>
<tbody>
<tr>
<td>Discount</td>
<td>10%</td>
<td>20%</td>
<td>35%</td>
<td>45%</td>
</tr>
</tbody>
</table>

**Instructor-Led Training**

If your enterprise is planning to enroll multiple students in an ILT course, you will qualify for a special volume discount. To learn more: Call: 800.687.7052 or +1 281.397.2440 or Email: htc@petex.utexas.edu

**Publications**

Order online and automatically receive a 15% discount whenever you purchase 25+ copies of a single publication. For further volume discounts on publications, please contact us at: Call: 800.687.4132 or +1 512.471.5940 or Email: info@petex.utexas.edu

</table>
PETEX learning solutions are designed for individuals and small- to large-size teams. All products and services that are listed below and throughout this catalog can be ordered online through our website. Visit petex.utexas.edu to place your order or to register for an instructor-led training (ILT) course.

Custom Programs and Enterprise Solutions

We can help you design and deploy a learning solution that suits your business needs. Call 800.687.4132 or +1 512.471.5940, or send an email to info@petex.utexas.edu with a description of your enterprise requirements to request a consultation.

Instructor-Led Training

Our ILT courses are held at our training centers in Houston and Odessa, Texas and/or online (See page 11.) For registration inquiries, email us at htc@petex.utexas.edu or call 800.687.7052 or +1 281.397.2440.

Visit petex.utexas.edu to register online for an ILT course.

Tuition

Your tuition must be paid in full at least thirty (30) days prior to the first day of class. After we receive your payment, you will receive an email confirmation with additional instructions, an invitation letter for VISA (if applicable), and a link to a map of the training center. Your tuition fee includes course instruction, classroom materials, lunch (as indicated), and light refreshments. Your tuition fee does not include travel expenses, additional meals, or accommodations, all of which are your responsibility. The tuition fee is for an individual unless specified otherwise. Tuition is subject to change without notice.

Cancellations

You may be eligible for a full (100%) refund of your tuition fee if your cancellation request is received at least thirty (30) days prior to the first day of class. You may be eligible for a partial (50%) refund if your cancellation request is received after the full-refund deadline passes but before eleven (11) days prior to the first day of class. No refund will be given for cancellations that are received within ten (10) days prior to the first day of class. You must submit your written request for cancellation in an email to htc@petex.utexas.edu. Please call 800.687.7052 or +1 281.397.2440 if you have questions concerning cancellations.

Transfers

You may transfer to another course if your request to do so is received at least seven (7) days prior to the first day of class. Enterprise clients: If we receive a transfer request six (6) days or less prior to the first day of class, you must select and submit to us the name and credentials of another internal employee who will be attending or else forfeit all tuition. If the transfer was approved by us but your employee does not attend the reassigned course for whatever reason, then you forfeit all tuition, enrollment will not be reassigned to another person from the company, and your employee will not be permitted to transfer to another course a second time. Individuals/Clients requesting a transfer to another class that is scheduled for the subsequent year will be responsible for any increase in tuition fees. Submit transfer requests in an email to htc@petex.utexas.edu. Please call 800.687.7052 or +1 281.397.2440 if you have questions concerning transfers.

Other Learning Tools

To order an e-learning Certificate Program, e-learning program, video, or e-book/print publication:

- **Call:** 800.687.4132 or +1 512.471.5940
- **Online:** petex.utexas.edu
- **Email:** info@petex.utexas.edu

Delivery

If you purchase an e-learning Certificate Program, e-book, or any e-learning program, you will receive instructions via email within two (2) hours (during normal business hours) that explain how to access your purchase.

We typically ship print media and videos via FedEx within three (3) business days after your order is placed. Please provide a street address when placing your order. We cannot ship to P.O. Box numbers.

To request special shipping arrangements, call 800.687.4132 or +1 512.471.5940. You are responsible for shipping charges and any sales tax that might be incurred at the time your order is placed. Additional delivery time might be required for special orders.

International Orders

We cannot ship an order until your payment is received in full. As an international customer, you are responsible for any fees, customs duties, and other taxes that might be incurred. Please consider this responsibility before placing your order with us.

Refunds and Exchanges

We do not accept returns or provide refunds unless a product is damaged during shipping. Please inspect your order carefully upon receipt. A return or exchange request must be made within five (5) business days of delivery. If your order is damaged, email info@petex.utexas.edu, or call 800.687.4132 or +1 512.471.5940.

Payment Methods

We accept Visa, Master Card, Discover, and American Express. We also accept company checks, wire transfers, and money orders made payable to The University of Texas at Austin. We do not accept personal checks or foreign checks.

Payments must be made and remitted in U.S. dollars and drawn on a U.S. bank. You are responsible for any bank handling fees that might be incurred.

Pricing

The price, terms, conditions, and availability of our learning tools and services are subject to change without notice. Visit petex.utexas.edu to obtain up-to-date information about our learning tools and services.

Customer Support

If you experience any technical problems or delivery issues:

- **Call:** 800.687.4132 or +1 512.471.5940
- **Email:** info@petex.utexas.edu

**AMERICAN EXPRESS, MASTERCARD, DISCOVER, AND VISA ARE ACCEPTED**
Accreditations

Certificate Programs

CERTIFICATE PROGRAMS

The University of Texas at Austin
Petroleum Extension (PETEX')
Cockrell School of Engineering
I	mprove your professional competency and earn continuing education units (CEUs) with industry-recognized PETEX certificate programs.

Whether you prefer the flexibility of learning remotely from your home or work computer or like learning firsthand from subject matter experts in a classroom setting, PETEX certificate programs provide a convenient, fast way to keep up with oil and gas trends and technologies.

How do PETEX certificate programs work? Select a Learning Certificate Program, or sign up for an instructor-led training (ILT) course, and receive a certificate of completion from The University of Texas at Austin–PETEX, plus a set number of CEUs* when you meet all requirements. It’s that easy. Details below.

**Learning Certificate Programs.** A self-paced assessment accompanies e-learning modules, videos, and select publications. Pass the assessment** to earn CEUs and download your certificate of completion.

**Instructor-Led Training.** Advance your understanding of O&G topics with the support of industry experts and professional peers. Join us for an immersive class at one of our learning centers or online, and earn CEUs plus a printed certificate of completion.

*The number of CEUs that you earn depends upon the length of the course or program and will appear on your certificate.

**A score of 70% or higher on an assessment is required to earn a certificate of completion.

**ACCREDITATIONS**

**Continuing Education Units**

Many people who support the O&G industry, such as engineers, land managers, attorneys, and accountants, must obtain a certain number of continuing education units, or CEUs, each year in order to maintain a professional license or certification. PETEX awards 1 CEU for every 10 hours that is spent completing a PETEX Certificate Program, including our e-learning options and instructor-led training courses. The amount and type of professional credit that will be awarded upon the successful completion of an ILT course or program is listed at the beginning of each course or program description.

**Licensing Agencies**

The following agencies award professional credit to Texas members who successfully complete select ILT courses.

**The American Association of Petroleum Landmen** awards professional credits to Texas members who complete Elementary Drilling, Petroleum Fundamentals, Pipeline Technology, and The Rig School.

**The Texas State Board of Public Accountancy** awards CPEs to members who complete Petroleum Fundamentals and The Rig School. These courses do not require any prerequisites.

**The Texas State Bar** awards 2.75 hours of MCLEs to members who complete The Rig School.

Your organization might award you with professional credit for completing a course even if the organization is outside of Texas or the U.S. Call 800.687.7052 or +1 281.397.2440, or email htc@petex.utexas.edu if you have questions about earning professional credit through instructor-led training. Call 800.687.4132 or +1 512.440.7723, or email info@petex.utexas.edu if you have questions about earning professional credit through e-learning.

**Texas Professional Engineers**

Professional engineers (PES) who work in Texas must complete 15 hours of continuing education activity each year in order to renew their license. The Texas Board of Professional Engineers (TBPE) regulates the engineering profession in Texas. This Board has the authority to audit the renewal information that licensees provide and may require proof of PEs’ educational activity. Our certificates of completion, which list the course or program title, participation dates, and number of CEUs earned, should serve as adequate proof; however, we can provide you with additional documentation if required. TBPE recommends that PEs maintain continuing education documentation for a period of three years.

Contact TBPE for additional information regarding continuing education requirements:

</table>
Each year, PETEX hosts a wide variety of instructor-led training courses in Houston and Odessa, Texas or online to enhance your understanding of the oil and gas industry. Taught by skilled experts with a wealth of real-life experiences, our instructors are passionate about what they do and are dedicated to your success both in and out of the classroom. Learn through robust discussions and interactive activities while building a network of professional contacts. Takeaways include helpful handouts and learning materials. Some courses include field trips, onsite lab work, and exams to assess learning outcomes. Receive continuing education units (CEUs) and a certificate of completion from The University of Texas at Austin–PETEX at the end of each course. See our full schedule of courses on pages 19–20.

**Face-to-face and hybrid instructor-led courses are held at:**

### OFFSHORE STRUCTURES PROFESSIONAL DEVELOPMENT COURSES

Texas Engineering Executive Education’s three offshore structure short courses offer a comprehensive overview of the fundamentals and practical aspects of offshore structures. The three courses comprise the brand-new “Fundamentals of Offshore Engineering Professional Certificate Program”. If participants complete all three courses within three years, they will receive the certificate. In addition, previous participants of DFOP/DFPS are eligible to receive this credential. These courses are offered in a live-online modality in partnership with Offshore Technology Research Center, The University of Texas at Austin, and Texas A&M University.

#### Fundamentals of Offshore Structures

2.85 CEUs

Developed specifically for engineers, scientists, and technologists, this course offering will review the fundamentals of all types of offshore structures (fixed or floating). The overall objective is to provide participants with an understanding of the design and construction of offshore platforms, specifically the theory and process of such design.

**Recommended For**

Engineers (BS holders) who work in the offshore industry, and wish to receive a comprehensive overview of the fundamentals and practical aspects of offshore structures. Best suited to new or recent hires or those who aspire to work in the offshore industry.

**Length** 10 days/3 hrs per day  
**Cost**  
- Early Registration—$1,250  
- Regular Registration—$1,360  
- Discounted Registration—$1,200

#### Design of Fixed Offshore Platforms

2.85 CEUs

This course offering will provide participants with an understanding of the design, construction, and current engineering methods for fixed offshore platforms. Explore topics such as Earthquake Engineering, Spectral Analysis Application, and Structural Reliability. In addition to the traditional lecture, the course encourages group discussions of actual design problems in order to ensure students can put the newly learned concepts to use.

**Recommended For**

Engineers (BS holders) who work in the offshore industry, and wish to receive a comprehensive overview of the fundamentals and practical aspects of offshore structures.

**Design of Floating Production Systems**  
3.3 CEUs  

This course is a must for professionals seeking understanding of the design and construction of floating platforms. Taught through a combination of lectures and discussion, you will gain a complete understanding of the fundamental design process and modern design practices in this field. Design principles are applied to ensure functionality and safety of various types of floating offshore structures, including tension leg platforms, semi-submersibles and FPSO’s. In addition, the theory and current practical engineering methods in relation to the design and construction of floating platforms will be covered. The final result of this course is real-world knowledge of the complete design process that you can apply immediately in the workplace.

**Recommended For**

Engineers (BS holders) who work in the offshore industry, and wish to receive a comprehensive overview of the fundamentals and practical aspects of offshore structures. Best suited to new or recent hires or those who aspire to work in the offshore industry.

**Length** 10 days/3 hrs per day  
**Cost**  
- Early Registration—$1,495  
- Regular Registration—$1,625  
- Discounted Registration—$1,425

**CONTACT** execed@engr.utexas.edu for more information
**GENERAL INDUSTRY/DRILLING**

**POPULAR SCHOOL**

**Petroleum Fundamentals**
3.3 CEUs, 35 CPEs for Texas Accountants, 27 CEUs for Texas Landmen
Covers the basics of petroleum, starting with industry terminology, geology, exploration, and leasing. Reviews drilling, production, transportation, equipment usage, and operating procedures upstream, midstream, and downstream. Addresses safety, economics and regulatory concerns. Customized, condensed course versions available.

**Course Content**
- Petroleum geology and exploration
- Aspects of leasing
- Drilling rig components and personnel
- Routine and nonroutine drilling operations
- Well control
- Production operations
- Petroleum transportation offshore and onshore
- Refining and processing
- Macroeconomic outlook of the upstream oil and gas business

**Recommended For**
New employees; attorneys; insurance, finance, accounting, and administrative personnel; and anyone who needs an overview of the petroleum industry.

**Included with Course**
- Catered lunch daily; beverages and snacks provided
- Industry field trip
- Course materials including instructor presentations

**Recommended Book** (discount when purchased during course): *A Dictionary for the Oil and Gas Industry, 2nd ed.*

**Dates**
- November 15–19, 2021
**Length**
- 4.5 days
**Cost**
- $2,695

**NEW COURSE**

**Fundamentals of Energy Resource**
0.4 CEUs
In this course, you will receive comprehensive training on all aspects of the ownership and valuation of oil and gas minerals, surface, wind and solar rights. This course will educate and equip you with the tools and resources needed to calculate the property rights value and prepare you to transact.

**Course Content**
- Property rights ownership
- Common ownership problems
- Land resource transactions
- Realizing the value of land resources
- Valuation of land resources

**Recommended For**
Landowners, oil and gas professionals, real estate agents, real estate brokers, solar farm developers, and wind farm developers.

**Included with Course**
- Course materials including instructor presentations

**Dates**
- February 17, 2021 (Online)
- May 11, 2021 (Online)
- August 31, 2021 (Online)
- December 2, 2021 (Online)
**Length**
- 4 hours (9:00-1:00pm CST)
**Cost**
- $485.00

**REVISED**

**Elementary Drilling**
3.0 CEUs
Covers basic onshore and offshore drilling practices and rotary rig components while providing an in depth look at well planning, rig systems, directional drilling, well control, fishing operations, deepwater drilling, and safety practices.

**Course Content**
- Introduction to petroleum
- Well planning
- Types of drilling rigs
- Power, hoisting, rotating, and circulating systems
- Blowout preventer system
- Drilling operations
- Well completions
- Deepwater drilling
- Rig safety

**Recommended For**
Entry-level drilling personnel and other professionals who need to know basic drilling principles and nomenclature.

**Included with Course**
- Catered lunch daily; beverages and snacks provided
- Industry field trip
- Course materials including instructor presentations

**Dates**
- July 19–23, 2021
**Length**
- 4.5 days
**Cost**
- $2,775

**OFFSHORE**

**POPULAR SCHOOL**

**The Rig School™—Introduction to Offshore Operations**
3.3 CEUs, 35 CPEs for Texas Accountants, 27 CEUs for Texas Landmen, and 2.75 MCLEs for Texas Lawyers
Provides the basics of offshore drilling operations. Explains the environment, logistics, equipment, procedures, safety requirements, emergency response, and regulations unique to petroleum exploration, drilling, and production activities offshore. Includes an overview of petroleum economics and investment decision-making specific to the offshore industry.

**Course Content**
- Geology and geophysics in offshore exploration
- Offshore lease acquisition
- Offshore drilling and production
- Well planning and business aspects
- Maritime and state law and offshore regulations
- Offshore storage and terminals
- Offshore catastrophes and emergency response
- Insurance for offshore operations
- Economics of offshore exploration and development

**Recommended For**
New employees; attorneys; insurance, finance, and administrative personnel; and anyone who needs basic knowledge of offshore operations.

**Included with Course**
- Catered lunch daily; beverages and snacks provided
- Industry field trips
- Course materials including instructor presentations demonstrations

**Dates**
- August 2–5, 2021
- October 18–22, 2021
**Length**
- 4 days
**Cost**
- $2,775

---

**AMERICAN EXPRESS, MASTERCARD, DISCOVER, AND VISA ARE ACCEPTED**
## Production Technology

### 3.0 CEUs per week (6.0 CEUs total)

Learn the basics of surface and subsurface production equipment and operations during a two-week session. Each course may also be purchased and attended separately.

### Course Content

#### 1ST WEEK—SUBSURFACE
- Reservoir fundamentals and natural drive mechanisms
- Wellhead equipment
- Artificial lift mechanisms and enhanced recovery
- Offshore production considerations

#### 2ND WEEK—SURFACE
- Production operations practices
- Separation
- Treating/measuring liquids and gas
- Produced water management and disposal
- Lease automation and emergency shutdown
- Oil and gas corrosion

### Recommended For

Technicians, foremen, production operators, and workover personnel.

### Included with Course
- Catered lunch daily; beverages and snacks provided
- Industry field trip
- Course materials including instructor presentations
- Recommended book: *Oil and Gas: The Production Story*, 2nd edition

### Dates
- **1st week—**June 14–17, 2021
- **2nd week—**June 21–24, 2021

### Length
- Subsurface: 4 days–3.0 CEUs
- Surface: 4 days–3.0 CEUs

### Cost
- $2,595 for the first week, or $2,595 for the second week

---

## Completion and Workover

### 3.0 CEUs total

Covers acceptable planning, techniques, and equipment for completion and stimulation of newly cased wells. Also covers planning, organizing, and supervising remedial and recompletion operations on old wells.

### Course Content

- Planning the job
- Constructing the wellbore
- Perforating the casing
- Stimulating the formation
- Equipping the well for production
- Working with fluids
- Working with slickline, wireline, and coiled tubing
- Primary and secondary cementing
- Recovering pipe and fishing
- Controlling scale and paraffin
- Preventing accidents at the work site

### Recommended For

Technicians and supervisory-level personnel involved in completion, production, or workover operations.

### Included with Course
- Catered lunch daily; beverages and snacks provided
- Course materials including instructor presentations

### Dates
- August 16–19, 2021

### Length
- 4 days

### Cost
- $2,595

---

## LNG: Basics of Liquefied Natural Gas

### 1.9 CEUs

Provides basic instruction about all facets of the liquefied natural gas (LNG) industry. Focuses on presenting a thorough understanding of LNG liquefaction and regasification facility operations from the process side and the reasons for the rapid expansion and evolution of the industry. Addresses three major building links of the LNG chain: liquefaction plant, transport ships, and receiving terminal.

### Course Content

- Overview of the LNG industry
- Baseload liquefaction plant
- Receiving terminal
- LNG shipping industry
- LNG project development
- Major equipment and supporting functional units in LNG plants
- Safety, security, and environmental issues
- Offshore LNG
- LNG industry in China
- Special topics: non-conventional LNG and risk management

### Recommended For

Managers new to the LNG industry; operating supervisors and engineers with suitable technical background; project managers.

### Included with Course
- Catered lunch daily; beverages and snacks provided
- Course materials including instructor presentations
- Publication: *LNG: Basics of Liquefied Natural Gas*

### Dates
- February 22–24, 2021 (Online)
- December 6–8, 2021

### Length
- 2.5 days

### Cost
- $1,590

---

### Event Sponsors

PETEX greatly appreciates the following companies that regularly host events throughout the year for students who attend our Rig School course.  
- AqualisBraemar
- Hall Maines Lugrin
- HFW
- Lockton Companies
- MatthewsDaniel

### Call for Instructors

Share your industry knowledge by providing engaging classroom and hands-on instruction. What’s in it for you?  
- A chance to actively support the industry  
- Enhance the technical expertise of today’s industry professionals

We invite industry experts to submit resumes for our contract instructor positions to htc@petex.utexas.edu.

### Field Trip Sponsors

PETEX would like to recognize the following companies and organizations for hosting field trips and on-site visits that enrich our instructor-led training programs.  
- Coastal Flow Liquid Measurement, Inc.  
- M&J Valve | SPX  
- Sealweld  
- Trillium Flow Technologies
Instructor-led Courses

ValvePro® Certified Valve Maintenance Technician
2.3 CEUs
PETEX and Sealweld Corporation have expanded the most current valve maintenance training program to include emerging technologies and the latest developments in valve commissioning, troubleshooting, and emergency sealing. This program combines online, computer-based training with hands-on instruction at a location that’s convenient for you: your offices, our facilities, or a third-party site. We also offer access to our online learning materials through subscriptions to our e-library.

Popular courses that we can customize:
- Fundamentals of Petroleum Measurement (available in compressed and extended versions)
- Hydraulics for Pipeline Engineers
- Mass Measurement of Hydrocarbon Fluids
- Natural Gas Measurement—Fundamentals
- Petroleum Fundamentals (available in compressed and extended versions)
- Petroleum Measurement Tank Calibration Witness Seminar
- Pipeline Technology
- Production Technology (Surface and Subsurface)

For more information see petex.utexas.edu/courses/custom-courses. Or to schedule a design consultation, email info@petex.utexas.edu or give us a call at 800.687.4132.

PRODUCTION

Valves and Actuators—Operation and Maintenance
2.2 CEUs
For liquid pipeline operations and maintenance personnel, this course provides basic instruction for the most common valves and actuators used on pipelines. Participants visit manufacturing facilities to see firsthand how valves and actuators are made. Field trips teach assembly and disassembly of valves and actuators.

Course Content
- Introduction to petroleum valves
- Various types of valves
- Introduction to actuators
- Slab gate valve disassembly, assembly, and maintenance review

Recommended For
Pipeline maintenance technicians.

Included with Course
- Catered lunch daily; beverages and snacks provided
- Industry field trips
- Course materials including instructor presentations

Dates November 16–18, 2021
Length 3 days
Cost $1,590

Valves and Actuators—Operation and Maintenance, cont.
- Expanding gate valve maintenance review
- Valve maintenance

CUSTOM COURSES FOR ENTERPRISE CLIENTS
Tailor your workforce training to your company’s needs with PETEX custom courses. Our design and development team can work with you to define learning goals and align our course materials to your brand and unique training requirements.

You can choose from traditional or technology-enhanced learning options to build a training program that’s right for your enterprise, including instructor-led courses, e-learning modules, and videos. Our O&G experts can deliver instruction at a location that’s convenient for you: your offices, our facilities, or a third-party site. We also offer access to our online learning materials through subscriptions to our e-library.

Popular courses that we can customize:
- Fundamentals of Petroleum Measurement (available in compressed and extended versions)
- Hydraulics for Pipeline Engineers
- Mass Measurement of Hydrocarbon Fluids
- Natural Gas Measurement—Fundamentals
- Petroleum Fundamentals (available in compressed and extended versions)
- Petroleum Measurement Tank Calibration Witness Seminar
- Pipeline Technology
- Production Technology (Surface and Subsurface)

For more information see petex.utexas.edu/courses/custom-courses. Or to schedule a design consultation, email info@petex.utexas.edu or give us a call at 800.687.4132.

ValvePro® Certified Valve Maintenance Technician
2.3 CEUs
PETEX and Sealweld Corporation have expanded the most current valve maintenance training program to include emerging technologies and the latest developments in valve commissioning, troubleshooting, and emergency sealing. This program combines online, computer-based training with hands-on instruction to offer the most complete valve care training available today. Based largely on existing Valve Maintenance Safety Training Seminars, ValvePro® offers practical and relevant information on thousands of valve maintenance concerns and teaches field and technical personnel to:
- Safely maintain, lubricate, and seal serviceable ball, gate, and plug valves.
- Identify valve fittings and adapters, understand their functions, recognize dangerous designs and how to safely install and operate new ones.
- Operate and maintain all makes and types of high-pressure injection equipment
- Assess the function and sealing integrity of lubricated valves commonly found in pipelines, plants, and offshore facilities.

ValvePro® training consists of two separate components:
- First component: (prerequisite) online, computer-based self-study course and test, which must be successfully completed (minimum score of 80) prior to attending the second component.

Length 20–30 hours
- Second component: 3-day, instructor-led training and test.

Length 3 days
Successful completion of both components awards students PETEX certification as a ValvePro® Certified Valve Maintenance Technician.

Classes are held in Houston, TX (USA), Calgary, AB (Canada) or additional locations by request.

Please visit www.valvepro.com to receive more information.
MEASUREMENT, CONTROL, AND STORAGE

Natural Gas Measurement—
Fundamentals
2.4 CEUs
Covers the basics of physical and chemical makeup of gas mixtures and how measurements of density and volume are affected by temperature and pressure. Covers the fundamentals of flow measurement of natural gas and how to obtain data, analyze, and determine precise measurement. Covers the basics of natural gas meter station designs, applications of volume-determining meters including the flow-conditioning requirements for orifice meters, gas turbine meters, Coriolis, and ultrasonic meters. Presents the pros and cons of different types of natural gas meters installed in the field and their relative preference for the type of application. Provides hands-on practice in inspecting dual-chamber orifice meter runs. Covers the basics of automatic and manual sampling of natural gas for the determination of the chemical composition and Btu values. Describes how gas composition and fluid properties affect measurement; and also describes higher order real-time diagnostic capabilities for UFM and Coriolis meters. Ties all this information to optimize the NGM system for field application.

Course Content
• Units of measurement
• Natural gas chemistry
• Physical behavior
• Flow measurement principles and design/application/inspection
  > Flow measurement principles
  > Flow conditioning principles
  > Orifice meters (gas)—design/application/inspection
  > Orifice plate inspections—dual chamber and major orifice fittings
  > Orifice flow meter run inspection and maintenance

Natural Gas Measurement—
Fundamentals, cont.
• Displacement meters (gas)—design/application/inspection
• Turbine meters (gas)—design/application/inspection
• Ultrasonic meters (gas)—design/application/inspection
• Coriolis meters (gas)—design/application/inspection
• Pulsation effects on accuracy of NGM measurement
• Meter station design/application/inspection
• Gas chromatographs: types and theory of operation, calibration, and analysis report
• Sampling and sample-handling basics: manual sampling for spot sample, automatic sampling for composite sample, and automatic sampling for flow weighted on-line analysis
• Safety while transporting sampling
• Odorant injection and detection systems; selection, operation, monitoring, testing, and maintenance issues
• H₂S analyzers: description and comparison of the theory and operation of the various H₂S measurement techniques

Recommended For
Gas measurement technicians, analysts, engineers, and personnel who witness or audit natural gas measurement.

Included with Course
• Catered lunch daily; beverages and snacks provided
• Course materials including instructor presentations
• Publication: Gas and Liquid Measurement

Dates
February 8–12, 2021 (Online)
August 24–26, 2021

Length
3 days

Cost
$1,885

NEW COURSE

Meter Assessment/Measurement Audit
0.4 CEUs
This virtual-led course helps students prepare for and survive a measurement audit.

Course Content
• Witnessing and inspection
• Natural gas orifice plate meters
• Natural gas cone meters
• Natural gas turbine meter
• Natural gas Coriolis meters
• Natural gas ultrasonic meters
• Natural gas sampling (manual and automatic)
• Natural gas chromatography
• Natural gas meter station design and installation review
• Natural gas documentation review

Recommended For
Measurement technicians, meter station operators, measurement supervisor, measurement engineers, measurement managers, measurement auditors, measurement witnesses, or any commercial sales and contract personnel (for information only).

Included with Course
• Course materials including instructor presentations (in secure PDFs)

Dates
May 18, 2021 (Online)
October 12, 2021 (Online)

Length
4 hours (9:00 am–1:00 pm CST)

Cost
$485

Lab Sponsors
We extend our sincerest gratitude to the following companies, which generously donate the equipment that students use during our measurement training programs. Thank you for helping us build a top-quality, hands-on laboratory.

MEASUREMENT, CONTROL, AND STORAGE

Fundamentals of Petroleum Measurement (first of three levels)
3.3 CEUs
Provides fundamentals in manual tank gauging, principles of operation of the primary dynamic meters, and a base knowledge on meter proving, factor calculation, and meter/tank ticket calculations. Uses the API Manual of Petroleum Measurement Standards and the ASTM Test Methods as the basis for instruction.

Course Content
- Static measurement
  > Types of tanks
  > Fundamentals of tank calibration by the manual strapping method
  > Lease tanks: level gauging, temperature determination, free water determination, and manual sampling
- Properties of petroleum
  > Density and gravity determination
  > S&W determination by centrifuge
  > Lease tank run ticket calculations
- Dynamic measurement
  > Overview of LACT/ACT installations
  > Introduction to automatic sampling: the flow metering theory; the operation of PD, turbine, Coriolis and ultrasonic meters; meter provers, meter proving, and prover calibration; and the calculations of meter factors and tickets
- Oil loss control
  > Introduction to basic principles

Recommended For
Personnel with a basic knowledge of the oil and gas business, especially pipeline, refining and production operations. Measurement operators, technicians, and engineers seeking a firm foundation or those new (6 months or less) to liquid volume measurement or who witness or audit measurement techniques.

Included with Course
- Catered lunch daily; beverages and snacks provided
- Course materials including instructor presentations
- Field exercises and demonstrations
- Publication: Primer of Oil and Gas Measurement

Dates January 25–29, 2021 and February 1–3, 2021 (Online)
(9:00 am–1:00 pm CST)
July 26–30, 2021 (Odessa)
September 13–17, 2021 (Houston)
November 8–12, 2021 (Odessa)

Length 4.5 days
Cost $2,385

Intermediate Petroleum Measurement (second of three levels)
3.3 CEUs
Builds on Fundamentals of Petroleum Measurement along with 1 to 3 years of field experience in measurement. Introduces some basic trouble-shooting techniques on both static tank measurement and dynamic measurement of quality and quantity of petroleum including refined products. Provides more information on the design and operation of various meter, prover, and automatic sampling system designs and the use of flow computers. Uses API MPMS and the ASTM Test Methods as basis for instruction.

Course Content
- Expands in more depth on each of the topics in Fundamentals of Petroleum Measurement
- Properties of petroleum—Physical properties, traffic testing, crude oil assays, multiple analysis, and analytical quality tests for refined products
- Static Measurement—ATG by radar, servo gauge, hybrid system, HTG, and mass systems; tank calibration by MTSM, ORLM, OTM, EODR, and TSRLM
- Dynamic measurement systems: troubleshooting, meter prover design and performance issues; calibration of meter provers, metering systems for marine terminals and load racks; automatic sampling systems, performance verification
- Oil loss analysis in three-region scenarios; use of control charts and other performance tools; system troubleshooting techniques

Recommended For
Personnel with 2 to 5 years of experience in pipeline, refining, and production measurement operations. Provides training for those participating in proven and sampling and their knowledge of various methods for measuring and for those seeking to enhance knowledge of measurement performance and audit techniques.

Included with Course
- Catered lunch daily; beverages and snacks provided
- Course materials including instructor presentations
- Field exercises and demonstrations
- Publication: Primer of Oil and Gas Measurement

Dates March 22–26, 2021 and March 29–31, 2021 (Online)
(9:00 am–1:00 pm CST)
September 20–24, 2021

Length 4.5 days
Cost $2,385

Advanced Petroleum Measurement (third of three levels)
3.3 CEUs
Builds on previous two courses and 2 to 5 years of field experience in measurement. Introduces additional trouble-shooting, problem-solving skills, and system performance analysis. Covers advanced techniques in loss control analysis, dynamic metering systems, and knowledge of various methods for calibrating both meter provers and above-ground storage tanks. Addresses needs for advanced EMFs and ATG systems. Uses API MPMS and the ASTM Test Methods.

Course Content
- Expands in more depth on each of the topics in Fundamentals of Petroleum Measurement
- Properties of petroleum—Physical properties, S&W analytical testing, crude oil assays, multiple analysis, and analytical quality tests for refined products
- Static Measurement—ATG by radar, servo gauge, hybrid system, HTG, and mass systems; tank calibration by MTSM, ORLM, OTM, EODR, and TSRLM
- Dynamic measurement systems: troubleshooting, meter prover design and performance issues; calibration of meter provers, metering systems for marine terminals and load racks; automatic sampling systems, performance verification
- Oil loss analysis in three-region scenarios; use of control charts and other performance tools; system troubleshooting techniques

Recommended For
Personnel with 2 to 5 years of experience in pipeline, refining, and production measurement operations. Provides training for those participating in proven and sampling system calibrations and certifications. Recommended for those seeking to enhance knowledge of measurement performance and audit techniques.

Included with Course
- Catered lunch daily; beverages and snacks provided
- Course materials including instructor presentations
- Field exercises and demonstrations
- Publication: Primer of Oil and Gas Measurement

Dates June 14–18, 2021
September 27–October 1, 2021

Length 4.5 days
Cost $2,385
MEASUREMENT, CONTROL, AND STORAGE

Mass Measurement of Hydrocarbon Fluids (Direct and Inferred)
3.3 CEUs
Teaches theory, installation, operation, and proving practices of mass measurement of light hydrocarbon fluids including natural gas liquids and other liquids. Provides instruction in meter proving and calculation of meter factors for meters in high vapor pressure service (e.g., propane or mixed NGLs). Provides instruction and simulation/demonstration of densitometer proving by pycnometer and pycnometer calibration. Demonstrates proper procedures and emphasizes safe practices; and provides instruction in the calculation of volumes at base conditions of single-grade light hydrocarbons from measured NGL mixes. Emphasis placed upon proper procedures and safe practices.

Course Content
• Fundamentals of measurement
• Static and dynamic measurement
• Proving a flow meter in high vapor pressure liquids
• Proving a density meter in high vapor pressure liquids
• Flowmeter prover calibration by water-draw or gravimetric methods
• Pycnometer calibration by the water weigh method
• Mass measurement by turbine meter and densitometer or by Coriolis flow meter
• Sampling and sample analysis
• Calculations for volume at base conditions from mass quantities and analysis of composite sample

Recommended For
Measurement technicians and engineers with 1 to 5 years of experience; and those who witness or audit measurement.

Included with Course
• Catered lunch daily; beverages and snacks provided
• Course materials including instructor presentations
• Field and classroom exercises

Dates October 25–29, 2021
Length 4.5 days
Cost $2,385

NEW COURSE
Tank Calibration Witness
0.8 CEUs
This virtual course helps students learn what to watch for and how to be an effective witness to a tank calibration.

Course Content
• Introduction to manual tank strapping
• Optical reference line
• Optical triangulation
• Electro-optical distance ranging
• Total station reference line
• Physical bottom surveys
• Deadwood measurements
• Reference measurements
• Capacity tables
• Tank calibration frequency

Recommended For
Engineer technicians, supervisors, tank farm operators and managers. As well as anyone involved with petroleum measurement by upright cylindrical above ground storage tanks.

Included with Course
Course materials including instructor presentations (in secure PDFs)

Dates June 29–30, 2021 (Online)
August 3–4, 2021 (Online)

Length 8 hours
Cost $785

INSTRUCTOR-LED COURSES

NEW COURSE
Material Loss Control in Refineries and Petrochemical Plants
1.6 CEUs
Covers the significant cash flow loss that comes from improper measurements or theft of materials from most refineries and petrochemical plants. Teaches learners to identify the common sources of losses and how to detect both erroneous measurement and intentional diversion.

Participants must have access to a laptop or tablet capable of running Excel or an equivalent spreadsheet app with the ability to do advanced math functions. There will be exercises and group projects included during the course.

Course Content
• Loss control and its financial and operations implications
• Accounting for the oil—balance pros & cons
• Sources of loss and risk assessment
• Measurement and instrument biases and recurring loss
• Theft opportunities and practices
• Methods for detecting losses and narrowing the areas of concern
• Oil loss reduction investigations

Recommended For
Engineers involved with measurement or loss control; internal auditors and investigators covering material control; and electrical and civil engineers working on pipelines. (Participants must be able to perform engineering-level computations.)

Included with Course
Course materials including instructor presentations (in secure PDFs)

Dates January 11–14, 2021 (Online)
May 2–6, 2021 (Online)

Length 16 hours
Cost $1,595

The University of Texas at Austin
Engineering Executive Education
Cockrell School of Engineering

Professional Development Programs
Results-based short courses, conferences, and custom courses that drive innovation and advance STEM careers. Visit uteng.org for more information.
Pipeline Technology
9 CEUs
Covers pipeline design, construction, operations, maintenance, and management. May be taken in one-week modules.

Course Content
1ST WEEK—PIPELINE DESIGN
4 days—3 CEUs
• Pipeline regulations
• Pipeline rights-of-way and contracts
• Electric prime movers and pipeline hydraulics
• Analysis and control of surges
• Mainline and station design and construction
• Selection of pipeline pumps

2ND WEEK—OPERATIONS
4 days—3 CEUs
• Product terminals and supervisory control systems
• Meters and measurement
• Power optimization
• Economics of pipeline transportation
• Mainline tanks and materials of construction

3RD WEEK—MAINTENANCE
4 days—3 CEUs
• Line maintenance
• Corrosion
• Maintenance equipment
• Leak detection
• Valve maintenance
• Welding
• Emergency response

Recommended For
Engineers new to the pipeline industry or those in special areas seeking a broader view of pipeline operations. Also serves as a refresher course for pipeline engineers.

Included with Course
• Catered lunch daily; beverages and snacks provided
• Course materials including instructor presentations for each session attended
• Use of scientific calculator and measurement tools

Recommended Book: A Dictionary for the Oil and Gas Industry, 2nd ed.

Dates
1st week—April 19–22, 2021 and April 26–29, 2021 (Online)
9:00 am–1:00 pm CST
September 13–16, 2021
2nd week—September 20–23, 2021
3rd week—September 27–30, 2021

Length
1st week—4 days—3 CEUs
2nd week—4 days—3 CEUs
3rd week—4 days—3 CEUs

Cost
$2,385 for the first week
$2,385 for the second week
$2,385 for the third week

NEW COURSE
Pipeline Risk
0.8 CEUs
Provides an overview of pipeline threats and consequences as well as the applicability of the different pipeline risk model types (Quantitative and Qualitative) to various risk management decisions. Also, this course will cover the essential elements and key concepts (inputs, outputs, and algorithms) of modern risk assessment.

Course Content
• Pipeline risk definition
• Integrity management program
• Risk assessment
• Integrity assessment
• Pipeline Threats and consequences
• Integrity management plan
• Performance plan
• Quality control plan
• Response to integrity assessment and mitigation

Recommended For
Professional individuals at all levels in both private and government sectors. Pipeline risk model is a fundamental part of the assessment of operational pipeline risk. Therefore, risk assessment must be understood by all levels to make risk-informed decisions, prioritize pipeline segments, determine the most effective mitigation measures for the identified threats, and effective resource allocation.

Included with Course
• Course materials including instructor presentations

Dates
March 9–10, 2021 (Online)
9:00 am–1:00 pm CST
November 2–3, 2021 (Online)
9:00 am–1:00 pm CST

Length
8 hours
Cost
$985

NEW COURSE
Hydraulics for Pipeline Engineers
3.0 CEUs
Covers basic pipeline hydraulics for engineers and design problems to include calculations for hydraulic gradients, pipe selection, telescoping, grade tapering, injection, and stripping. Discusses equipment and methods of surge control.

Participants should plan on bringing a laptop or tablet capable of running Excel or an equivalent spreadsheet app with the ability to do advanced math functions.

Course Content
• Introduction to pipeline hydraulics
• Fluid characteristics and pipeline design codes
• Basic hydraulics equations and friction loss equations
• Energy and surge considerations and system control
• Hydraulic gradient
• Pipe selection and pumps
• Pipeline economics

Recommended For
Engineers new to the pipeline industry or those seeking practical knowledge. Also for electrical and civil engineers working on pipelines. Participants must be able to perform engineering-level computations.

Included with Course
• Catered lunch daily; beverages and snacks provided
• Course materials including instructor presentations
• Use of scientific calculator and measurement tools
• Publications: Cameron Hydraulic Data and Crane Technical Paper 410

Dates
August 9–12, 2021
December 6–9, 2021

Length
4 days
Cost
$2,275

Keeping up with your education can be tough. Now you can learn on your schedule with our complete line of flexible and innovative O&G learning tools. Discover a new topic, or brush up on a specific skill with a digital format that fits your learning style.

**Online Certificate Programs.** Explore an O&G topic with select e-books, print publications, and e-learning courses. Then, assess your understanding of the material with an online exam. Pass the exam, and earn continuing education units (CEUs) plus a professional certificate from The University of Texas at Austin–PETEX, all from the comfort of your home or office.

**E-Learning Modules.** Explore the O&G topics that matter most to you. Access our e-learning modules online to discover the upstream, midstream, and downstream sectors. Features include full-color videos, animation, glossaries, assessments, easy-to-use search tools, and a certificate of completion when you earn a passing score. See our complete line of e-learning modules on page 28, and view previews online at www.utexas.edu/digital/elearning.

**E-Courses.** These are collections of modules related by topic that give a broader understanding of an area of the industry. Customers can select one of our recommended e-courses. For your enterprise or institution, you may select individual modules for a custom course of study that fits your learning needs.

**Blended Learning.** Our blended learning approach to professional development combines online activities with robust classroom discussions to create a comprehensive learning environment.

**Enterprise Solutions.** If you would like access to our e-learning and assessment tools, we offer customized subscriptions to our e-library.

**Convenience.** Remove the hassle of having to install a new Learning Management System. All PETEX e-learning options are easily implemented into your company’s or institution’s current learning management system, creating a smooth and effortless experience.

Call **800.687.4132** or **+1 512.471.5940**, or email info@petex.utexas.edu to learn how we can support your large enterprise.

---

**The University of Texas at Austin**
**Engineering Executive Education**
**Cockrell School of Engineering**

Earn an engineering Master’s degree while working (weekend or online). Programs in Engineering Management, Mechanical Engineering, and Software Engineering.

Visit uteng.org/pme for more information.
E-COURSE
Petroleum Fundamentals
3.5 CEUs
Contains much of the same content provided in the popular classroom course and book, *Fundamentals of Petroleum*, 5th ed. in a complete e-learning course delivered to your computer. This course offers 32 multimedia training modules that teach the full spectrum.

Course includes these individual e-modules:

- Introduction to Petroleum
- Petroleum Geology
- Petroleum Exploration
- Formation Evaluation
- Types of Wells
- Offshore Oil and Gas Leasing
- Onshore Oil and Gas Leasing
- Well Planning
- Overview of Drilling Systems
- Interactive Offshore Rig
- Interactive Onshore Rig
- The Power System
- The Hoisting System
- The Rotating System
- The Circulating System
- Blowout Prevention System
- Rotary Drilling Rig Types
- People and Companies
- Routine Drilling Operations
- Controlled Directional Drilling
- Open-Hole Fishing
- Well Control
- Reservoir Drive Mechanisms
- Well Completion
- Artificial Lift
- Well Stimulation
- Improved Recovery Techniques
- Surface Handling of Well Fluids
- Well Service and Workover
- Transporting Petroleum, Derivatives, and Natural Gas
- Refining and Processing Petroleum
- Petroleum Economics

Certificate program: 35+ hours
Cat. no. 97.C0110 $995

---

E-LEARNING MODULE
Introduction to Petroleum
Learn the basics of where petroleum comes from, the history of drilling and transporting oil, and how crude oil is transformed into valuable products. Covers the petroleum industry sectors and the major forces driving the oil market. Certificate of completion is awarded upon passing assessment.

75 to 90 minutes.
Cat. no. 96.M0110 $95

---

E-LEARNING MODULE
Offshore Oil and Gas Leasing
Learn how the U.S. federal and state governments regulate offshore rights and how leases in the Gulf of Mexico planning areas are managed; as well as the common forms of cooperation agreements, the bidding process, and more. Certificate of completion is awarded upon passing assessment.

45 to 60 minutes.
Cat. no. 96.M0610 $65

---

E-LEARNING MODULE
Onshore Oil and Gas Leasing
Understand types of ownership of land, minerals, and associated rights. Learn common leasing terminology, lease terms and provisions, operating agreements, and more. Certificate of completion is awarded upon passing assessment.

45 to 60 minutes.
Cat. no. 96.M0510 $65

---

E-LEARNING MODULE
Types of Wells
Learn about various types of wells: exploratory, wildcat, appraisal, development, and production wells. Certificate of completion is awarded upon passing assessment.

30 to 45 minutes.
Cat. no. 92.M1510 $65

---

E-LEARNING MODULE
Well Planning
Understand the importance of well planning and the well plan, its purpose, and the steps and people involved in the well program. Certificate of completion is awarded upon passing assessment.

30 to 45 minutes.
Cat. no. 96.M0410 $50

---

E-LEARNING MODULE
People and Companies
Learn about the types of companies involved in the drilling process and their roles. Learn about the roles of the various onshore and offshore rig personnel and how they all work together for successful drilling operations. Certificate of completion is awarded upon passing assessment.

45 to 60 minutes.
Cat. no. 96.M0710 $65

---

General Industry
Petroleum Economics
Understand the economics of creating new hydrocarbon supplies and the business models of upstream, midstream, and downstream business units; as well as how revenue trends and variables that contribute to world crude oil prices and demand. Certificate of completion is awarded upon passing assessment.

30 to 45 minutes.
Cat. no. 96.M0810 $65

---

Content is copyright of The University of Texas at Austin–PETEX® and may not be reproduced in any form without express permission.
EXPLORATION

E-LEARNING MODULE
Formation Evaluation
Learn about formation evaluation and techniques, the advantages and disadvantages of each, and mud logging, wireline logging, coring, drill stem testing, and MWD and LWD. Certificate of completion is awarded upon passing assessment. 90 to 105 minutes.
Cat. no. 92.MI410 $100

E-LEARNING MODULE
Petroleum Exploration
Covers the methods of geologic data collection and the tools and tests used. Learn about the application of geologic maps and cross sections and how seismic exploration works, and how data is interpreted. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.
Cat. no. 96.M0310 $65

E-LEARNING MODULE
Petroleum Geology
Learn what petroleum and hydrocarbons are and how they are formed, explored, and produced; as well as properties of rocks that serve as oil and gas reservoirs, pressure variables, crude oil composition, measurement, and more. Certificate of completion is awarded upon passing assessment. 90 to 120 minutes.
Cat. no. 96.M0210 $115

E-COURSE
Elementary Drilling
2.0 CEUs
Composed of 15 interactive multimedia training modules to help you understand the fundamentals of rotary drilling practices and rig components.
Course includes these individual e-modules:
• Introduction to Petroleum
• Well Planning
• Interactive Onshore Rig
• Interactive Offshore Rig
• Power System
• Hoisting System
• Rotating System
• Circulating System
• Blowout Prevention System
• Rotary Drilling Rig Types
• People and Companies
• Routine Drilling Operations
• Controlled Directional Drilling
• Open-Hole Fishing
• Well Control
Certificate program: 16 to 20 hours
Cat. no. 92.C0110 $595

DRILLING

E-COURSE
Introduction to Petroleum and Drilling Systems Overview
0.2 CEUs
Helps you understand where petroleum comes from, the history of drilling and transporting oil, and how crude oil is transformed into valuable products. Learn about the major petroleum industry sectors and the major forces driving the oil market. Covers the key systems involved in drilling: hoisting, rotating, circulating, power systems, as well as blowout prevention.
Course includes these individual e-modules:
• Introduction to Petroleum
• Overview of Drilling Systems
Certificate program: 90 to 135 minutes
Cat. no. 97.C0310 $135

E-COURSE
Oilwell Drilling Primer
2.5 CEUs
The content of the best-selling book, A Primer of Oilwell Drilling, 7th ed., has been transformed into interactive e-learning that lets you experience a drill rig up-close on your computer screen for detailed study. Special features and quizzes test learning.
Course includes these individual e-modules:
• Introduction to Petroleum
• Petroleum Geology
• Petroleum Exploration
• Types of Wells
• Rotary Drilling Rig Types
• People and Companies
• Interactive Onshore Rig
• Interactive Offshore Rig
• Overview of Drilling Systems
• Power System
• Hoisting System
• Rotating System
• Circulating System
• Blowout Prevention System
• Routine Drilling Operations
• Formation Evaluation
• Well Completion
• Well Stimulation
• Controlled Directional Drilling
• Open-Hole Fishing
• Well Control
Certificate program: 25 hours
Cat. no. 92.C0310 $695

Interactive Offshore Oil Rig
Explore the inner workings of an offshore rig.
See full description on page 25.
E-LEARNING MODULE
Controlled Directional Drilling
Understand the types of directional drilling and the special considerations and challenges; as well as the complex types of equipment used. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.
Cat. no. 92.M0910 $65

E-LEARNING MODULE
Open-Hole Fishing
Understand the different ways that pipe and equipment get stuck in a hole and the various techniques and tools used, plus a video. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.
Cat. no. 92.M310 $95

E-LEARNING MODULE
Overview of Drilling Systems
Covers rotary drilling and the key systems: hoisting, rotating, circulating, power, and blowout prevention. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.
Cat. no. 92.M0110 $50

E-LEARNING MODULE
Rotary Drilling Rig Types
Covers land and offshore rigs and platforms and why certain types are selected; also about MODUs, marine risers, and heave compensators. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.
Cat. no. 92.M1110 $95

E-LEARNING MODULE
Routine Drilling Operations
Understand the routine steps used in most drilling operations, including starting a new well, casing, cementing, and tripping in and out. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.
Cat. no. 92.M0810 $95

DRILLING
Rig Components

E-LEARNING MODULE
Interactive Onshore Rig
Helps you understand the inner workings of a typical land rig. See and hear about what each component does and where it is located. Zoom in for close-up views. Note: This program does not grant a Certificate of Completion. 30 to 45 minutes.
Cat. no. 92.T0110 $50

E-LEARNING MODULE
Interactive Offshore Rig
Learn about the inner workings of a semi-submersible rig. See and hear about the sections of the rig, its mechanical components, where each is located, and zoom in for close-up views. Interactive training such as this is especially useful for oil and gas industry personnel seeking understanding of the parts of this key component of drilling offshore. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.
Cat. no. 92.T0210 $65

E-LEARNING MODULE
The Circulating System
Learn all about the circulating system, including its components, processes for liquid and air/gas drilling fluids, and the role of drilling fluid in the drilling process. Certificate of completion is awarded upon passing assessment. 150 to 180 minutes.
Cat. no. 92.M0510 $165

E-LEARNING MODULE
The Hoisting System
Understand how the drill string is raised and lowered and detailed function of the drawworks, blocks, drilling line, mast, substructure, and more. Certificate of completion is awarded upon passing assessment. 60 to 90 minutes.
Cat. no. 92.M0310 $95

E-LEARNING MODULE
The Power System
Learn about the power distribution systems on mechanical rigs, direct current (DC) electric rigs, silicone-controlled rectification (SCR) rigs, and variable frequency drive (VFD) system rigs; covers how each component works and its advantages/disadvantages. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.
Cat. no. 92.M0210 $75

E-LEARNING MODULE
The Rotating System
Understand the system that rotates the bit and the components of the rotary table system; covers the top drive, the downhole motor, drill string, and use and selection of bits. Certificate of completion is awarded upon passing assessment. 90 to 120 minutes.
Cat. no. 92.M0410 $135

E-LEARNING MODULE
Routine Drilling Operations
Understand the routine steps used in most drilling operations, including starting a new well, casing, cementing, and tripping in and out. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.
Cat. no. 92.M0810 $95

E-LEARNING MODULE
Overview of Drilling Systems
Covers Rotary Drilling Series
The most complete lesson series available!
A value of $1,584.
Buy all five units (29 books) for discounted price of only $1,424!
WELL CONTROL

E-LEARNING MODULE
Blowout Prevention System
Learn how well blowouts occur, the causes and signs of blowouts, blowout prevention, BOP system components, the kick circulating system, and special equipment used offshore. Certificate of completion is awarded upon passing assessment. 60 to 90 minutes.
Cat. no. 92.M0710 $95

E-LEARNING MODULE
Well Control
Learn how to control a kick and prevent a well from blowing out; covers the formation pressures and the well control and operations and methods. Certificate of completion is awarded upon passing assessment.
Prerequisite: Recommended to complete Blowout Prevention System module for better understanding. 45 to 60 minutes.
Cat. no. 96.M1210 $65

E-COURSE
Production Basics
0.8 CEUs
Eight interactive multimedia training modules that teach the basics of oil production practices including reservoir drive mechanisms, well completion operations, artificial lift methods, well stimulation, well service and workover operations, and improved recovery techniques. Learn about the origins of petroleum, the history of drilling and how crude oil is transformed into valuable products.
Course includes these individual e-modules:
• Introduction to Petroleum
• Reservoir Drive Mechanism
• Well Completion
• Artificial Lift
• Well Stimulation
• Improved Recovery Techniques
• Surface Handling of Well Fluids
• Well Service and Workover
Certificate program: 8 to 10 hours
Cat. no. 93.C0110 $395

PRODUCTION

E-LEARNING MODULE
Reservoir Drive Mechanisms
Learn more about the natural pressures that cause reservoir fluids to flow into the bottom of the wellbore. 30 to 45 minutes
Cat. no. 93.M0910 $50

E-LEARNING MODULE
Surface Handling of Well Fluids
Understand the steps necessary to prepare oil or gas for sale at the surface in terms of handling processes and equipment; learn how crude oil is prepared, stored, sampled, measured, and tested. 60 to 75 minutes.
Cat. no. 93.M0710 $65

Artificial Lift

E-LEARNING MODULE
Artificial Lift
Learn when artificial lift is necessary and the various lift methods such as beam pumping, subsurface hydraulic pumping, electric submersible pumping, and more. 75 to 90 minutes.
Cat. no. 93.M0310 $95

Fundamentals of Petroleum is available in print or e-book and as a certificate program (page 36). Petroleum Fundamentals is an instructor-led course that provides learners with a certificate of completion (page 12).
E-LEARNING MODULE
Well Completion
Learn about the basic steps of well completion and design and the equipment and mechanisms used; learn about perforating options, considerations for lower completions, and special completions including horizontal wells, extended-reach drilling, and multiple completions. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.  
Cat. no. 93.M0110 $65

E-LEARNING MODULE
Well Service and Workover
Covers the types of well service equipment and common types of problems such as equipment failure, depleted reservoirs, excessive water and gas production, and poor production rates along with potential solutions. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.  
Cat. no. 93.M0810 $95

E-LEARNING MODULE
Well Stimulation
Understand well stimulation and some commonly used techniques such as matrix acidizing and hydraulic fracturing; covers the factors affecting well production, why stimulation is needed and types of hydraulic fracturing equipment. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.  
Cat. no. 93.M0510 $65

E-LEARNING MODULE
Refining and Processing Petroleum
Learn how crude oil is converted into valuable products such as fuel, lubricating oil, and petrochemicals. Learn about the make up and standard types of crude oil, types of hydrocarbons, types of refineries and processes, economic issues and environmental concerns. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.  
Cat. no. 95.M0110 $95

E-LEARNING MODULE
Transporting Petroleum, Petroleum Derivatives, and Natural Gas
Understand how petroleum, petroleum products, and natural gas are transported to refineries and processing plants and to the consumer; covers the distribution chain, pipelines, and modes of transportation. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.  
Cat. no. 94.M0110 $65

E-LEARNING MODULE
Well Completion
Learn about the basic steps of well completion and design and the equipment and mechanisms used; learn about perforating options, considerations for lower completions, and special completions including horizontal wells, extended-reach drilling, and multiple completions. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.  
Cat. no. 93.M0110 $65

E-LEARNING MODULE
Well Service and Workover
Covers the types of well service equipment and common types of problems such as equipment failure, depleted reservoirs, excessive water and gas production, and poor production rates along with potential solutions. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.  
Cat. no. 93.M0810 $95

E-LEARNING MODULE
Well Stimulation
Understand well stimulation and some commonly used techniques such as matrix acidizing and hydraulic fracturing; covers the factors affecting well production, why stimulation is needed and types of hydraulic fracturing equipment. Certificate of completion is awarded upon passing assessment. 45 to 60 minutes.  
Cat. no. 93.M0510 $65

E-LEARNING MODULE
Refining and Processing Petroleum
Learn how crude oil is converted into valuable products such as fuel, lubricating oil, and petrochemicals. Learn about the make up and standard types of crude oil, types of hydrocarbons, types of refineries and processes, economic issues and environmental concerns. Certificate of completion is awarded upon passing assessment. 75 to 90 minutes.  
Cat. no. 95.M0110 $95

E-LEARNING MODULE
Transporting Petroleum, Petroleum Derivatives, and Natural Gas
Understand how petroleum, petroleum products, and natural gas are transported to refineries and processing plants and to the consumer; covers the distribution chain, pipelines, and modes of transportation. Certificate of completion is awarded upon passing assessment. 60 to 75 minutes.  
Cat. no. 94.M0110 $65

**GENERAL INDUSTRY**

**Profile: The Petroleum Industry**

From the vast reaches of West Texas and offshore Louisiana to the bustling metropolises of Los Angeles and Houston, viewers learn about the fascinating people, processes, and equipment that are required to find, drill for, produce, transport, and refine oil and gas. 1981, 30 minutes.

Cat. no. 65.0121: DVD $75
Streaming $50

**BEST SELLER**

**Makin’ Hole: How Oilwells Are Drilled**

Ever wondered how a drilling rig drills a well? If so, this program is for you. In easy-to-understand language and pictures, it explains the basics of seismic exploration, site preparation, and rigging up. The camera then visits a land rig and follows a crew through the process of drilling a well, including making a connection, tripping in and out, and routine drilling operations. Covers both land and offshore drilling operations. 1999, 23 minutes.

Cat. no. 65.0120: DVD $149
Streaming $99

**Makin’ Hole Certificate Program**

0.1 CEUs

This self-study training package includes an online assessment* (with 25 questions) and a copy of the video, Makin’ Hole: How Oilwells Are Drilled. Earn a Certificate of Completion from the University of Texas at Austin—PETEX when you successfully finish this program. Est. time commitment: 23 minutes + test time.

Cat. no. 65.0120AV
DVD + Assessment $199
Streaming + Assessment $149

**BEST SELLER**

**So You Want to Be a Roughneck? (¿Así que quiere trabajar en pozos petrolíferos?)**

Familiarizes entry-level rig floor personnel with what drilling is all about. Contains three sections: rig equipment, personnel, and personal protective equipment. Explains that a considerable amount of hardware is needed to drill a hole in the earth, covers who’s who on the rig and what they do, and points out that floorhands must follow safe work procedures and wear proper protective equipment. 2002, 40 minutes. Also available in Spanish as ¿Así que quiere trabajar en pozos petrolíferos?

English: cat. no. 65.6070: DVD $149
Streaming $99
Spanish: cat. no. 65.6071: DVD $149
Streaming $99

**Roughneck Training, Complete Set**

Assists rotary helpers in learning about proper care and handling of the drill stem. Includes a workbook. Sponsored by the International Association of Drilling Contractors (IADC). 1983.

**Parts I–V**

Cat. no. 65.0519: DVD $293
Streaming $195

**Part I: Care and Use of Tongs**

Describes the two main types of tongs and points out proper use and maintenance. 12 minutes, workbook.

Cat. no. 65.0520: DVD $68
Streaming $45

**Part II: Laying Down Pipe**

Shows how drill pipe and drill collars should be laid down, inspected, and prepared for transport to the next location. 11 minutes, workbook.

Cat. no. 65.0521: DVD $68
Streaming $45

**Part III: Making a Trip**

Points out factors rotary helpers should consider to make a round trip in a proper and safe manner. 18 minutes, workbook.

Cat. no. 65.0522: DVD $68
Streaming $45

**Part IV: Making a Connection**

Identifies points that the drilling crew should be aware of when adding a mouse-hole joint to the drill string, including inspection, preparation, and procedures. 12 minutes, workbook.

Cat. no. 65.0523: DVD $68
Streaming $45

**The Rig School™—Introduction to Offshore Operations**

Enroll today to learn about offshore rig operations. Learn from industry experts, enjoy field trips, and network with other professionals. See page 12.
**DRILLING**

**Part V: Care and Handling of Rotary Slips**

Slips are simple, rugged devices but must be properly used and maintained. Shows floorhands how to properly care for and handle drill pipe and drill collar slips. Safety clamps are also covered. 1999, 25 minutes, workbook.

Cat. no. 65.0524: DVD $68
Streaming $45

**Casing and Cementing**

**Cement and Cement Additives**

Covers the basic characteristics and uses of cement and the additives used to tailor it to the varied conditions encountered down-hole. Builds a better understanding of how important cement is to successful drilling. Produced in cooperation with Halliburton. 1981, 21 minutes, 135 slides, workbook.

Slide-tape transfer on video
Cat. no. 65.1125: DVD $53
Streaming $35

**Handling and Running Casing**

Shows the procedures drilling and casing crews should follow to safely and properly handle and run casing into the hole. Includes unloading and stacking procedures, tallying, picking up, tonging, and lowering into the wellbore. Also points out the importance of frequent mud fill-up. Produced in cooperation with Transocean. 2000, 16 minutes.

Cat. no. 65.6010: DVD $113
Streaming $75

**Liner Cementing**

Defines liners, tells why they are used, describes tools needed to set them, and discusses problems encountered and how to overcome or minimize them. Produced in cooperation with Halliburton. 1980, 30 minutes, 132 slides, workbook.

Slide-tape transfer on video
Cat. no. 65.1124: DVD $45
Streaming $30

**Drilling Fluids**

**The Pit Watcher**

This program explains why it is so important for rig personnel to pay close attention to the drilling mud system. It also covers the role each piece of equipment in the mud-handling system plays and tells why it is vital for rig crewmembers to closely monitor the mud. Produced in cooperation with Transocean. 2001, 22 minutes.

Cat. no. 65.6030: DVD $98
Streaming $65

**Drill Stem and Bits**

**No Fishing This Year: Care and Handling of Drill Pipe, Drill Collars, and Tool Joints**

Demonstrates what the rig crew can do to increase the life of the drill stem, starting with unloading the pipe at the rig, running it into and out of the hole, and finally laying it down. 1980, 25 minutes.

Cat. no. 65.0107: DVD $75
Streaming $50

**Rig Components**

**Care and Maintenance of Blocks, Top Drives, and Rotaries**

Shows rig crewmembers how to safely and properly maintain the blocks, top drive, and rotary table on their rig. This program stresses the importance of safe working practices while a person is suspended above the rig floor or greasing the crown block. It also points out that although many rigs feature top drives, crewmembers must still properly maintain the rotary table. Produced in cooperation with Transocean. 2001, 16 minutes.

Cat. no. 65.6060: DVD $98
Streaming $65

**Diesel Prime Movers**

Covers fuel, exhaust, cooling, and lubrication systems of four- and two-stroke-cycle diesel engines for motorhands and also gives basic start-up, maintenance, and troubleshooting procedures. 1984, 25 minutes, 140 slides, workbook.

Slide-tape transfer on video
Cat. no. 65.1092: DVD $45
Streaming $30

**The Drawworks**

The big hoist that raises and lowers tons of drill pipe and other tools out of and into the hole is a vital piece of equipment in the hoisting system. This program explains that while the drawworks is a large, rugged, and dependable device, the rig crew must properly maintain it to provide reliable day-in-and-day-out service. Besides covering conventional DC drawworks, this audiovisual also shows the latest AC drawworks. Produced in cooperation with Transocean. 2001, 23 minutes.

Cat. no. 65.6040: DVD $98
Streaming $65

**Safety**

**Hand Injuries in Drilling**

This program presents a graphic view of the dangers to the hands on a drilling rig. Shows rig personnel how to protect hands from injuries. Produced in cooperation with the International Association of Drilling Contractors (IADC). 1979, 17 minutes, 56 slides.

English slide-tape transfer on video
Cat. no. 65.1145: DVD $68
Streaming $45

**Manos lesionadas durante operaciones de perforación**

Spanish slide-tape transfer on video
Cat. no. 65.3900: DVD $30
Streaming $20

**Hearing Conservation: A Sense of Importance**

Stresses how important it is for rig personnel to make every effort to protect their hearing. Produced in cooperation with the International Association of Drilling Contractors (IADC). 1985, 11 minutes, 91 slides, nonillustrated script.

Slide-tape transfer on video
Cat. no. 65.1119: DVD $45
Streaming $30

**Use and Care of Basic Tools**

Gives a general introduction to the types of hand tools used on rigs and leases and tells how to use and care for them correctly. While a new hire will find this program particularly useful, even experienced individuals will benefit from the pointers given. 1973, 26 minutes, 129 slides, workbook.

English slide-tape transfer on video
Cat. no. 65.1367: DVD $45
Streaming $30

**El uso y mantenimiento de herramientas básicas**

Spanish slide-tape transfer on video
Cat. no. 65.3622: DVD $30
Streaming $20

Field Gas Processing
Glycol Dehydrators, Complete Set
Slide-tape transfer on video
Cat. no. 65.1170: DVD $360
Streaming $240

1. Principles of Operation
Explains the basic principles and the flow pattern of a typical glycol system. Part of the PETEX-API Audiovisual Repository. 1990, 28 minutes, 132 slides, instructor guide, student guide, glossary.
Slide-tape transfer on video
Cat. no. 65.1171: DVD $98
Streaming $65

2. Operating Conditions and Limits
Discusses temperature, pressure, liquid level, and flow rate and tells how each affects the operation of equipment in a glycol dehydration system. Part of the PETEX-API Audiovisual Repository. 1991, 23 minutes, 129 slides, instructor guide, student guide, glossary.
Slide-tape transfer on video
Cat. no. 65.1172: DVD $98
Streaming $65

3. Unit Start-Up and Shutdown
Slide-tape transfer on video
Cat. no. 65.1173: DVD $98
Streaming $65

4. Maintenance, Care, and Troubleshooting
A glycol dehydration unit requires maintenance and care if it is going to operate properly, as does the glycol itself. It can save money if field personnel know basic troubleshooting procedures. Part of the PETEX-API Audiovisual Repository. 1991, 20 minutes, 104 slides, instructor guide, student guide, glossary.
Slide-tape transfer on video
Cat. no. 65.1174: DVD $98

4-COLOR EDITION

Land and Leasing, 2nd ed.

For landowners, oil and gas investors, oil company employees, land professionals, and anyone interested in becoming a land professional. Authored by experienced land professionals Dan McCue and Deborah Hubbs, this updated edition explains the legal aspects of using land for mineral production, including ownership, leasing, and agreements for exploration and development. Appendices offer supplemental information on regional leasing practices and calculating interests. 2013, 224 pp.

Cat. no. 1.00120 ISBN 978-0-88698-263-8
Print $76
E-Book $65
Print + E-Book $91

Land and Leasing Certificate Program

3.0 CEUs

This self-study training package includes an online assessment* (with 250 questions) and a copy of Land and Leasing (print or e-book). Earn a Certificate of Completion from the University of Texas at Austin—PETEX when you successfully finish this program. Est. time commitment: 30 hours.

Print Book + Assessment
Cat. no. 1.00120AP $226
E-Book + Assessment
Cat. no. 1.00120AE $215

NEW EDITION

Applied Mathematics for the Petroleum and Other Industries, 5th ed.

For industry shop and field personnel who use practical mathematics on the job. Covers numbers, hand calculators, percentages and proportions, and physical quantities and measurement. Also reviews the principles of algebra, practical geometry, basic trigonometry, and advanced industry applications and includes reference tables, common formulas, and conversion factors. Each chapter includes objectives, how-to information, practice problems, and a self-test. 2019, 324 pp.

Cat. no. 1.60050 ISBN 0-88698-284-7
Print $89
E-Book $76
Print + E-Book $104

Basic Electricity for the Petroleum Industry, 2nd ed.

Covers electrical flow; electrical power, magnetism, and electricity; and electrical generation. Also discusses electric motors, transformers, measurement of voltage, current, and other variables. 1979, 152 pp.

Cat. no. 1.40020 ISBN 0-88698-109-3
Print $37
E-Book $31
Print + E-Book $52

Basic Electricity for the Petroleum Industry Workbook

Supplements Basic Electricity for the Petroleum Industry, 2nd ed.

This companion to Basic Electricity for the Petroleum Industry is designed to help learners understand and retain the material covered in the book. Learning objectives are stated and self-study questions address the main points in each chapter. 1981, 48 pp.

Cat. no. 1.40026 ISBN 0-88698-136-0
Print $16

Discusses the elementary concepts of electricity and magnetism and the principles of solid-state electronics. Contains an extensive glossary and review questions. 2003, 238 pp.

Cat. no. 1.41040 ISBN 0-88698-199-9
Print $84
E-Book $71
Print + E-Book $99

Basic Instrumentation, 4th ed.

Developed for those who need to understand the basic principles and operation of instruments used in measuring and controlling processes. Profusely illustrated and written in an easy-to-understand manner. 2002, 326 pp.

Cat. no. 1.20040 ISBN 0-88698-197-2
Print $84
E-Book $71
Print + E-Book $99

Changing the Way America Thinks About Energy: A Compendium of Commentary

Energy policy expert Dr. Michael E. Webber presents a series of original insights on energy strategy and offers prescriptions for sound, rational energy policy solutions at the state, federal, and international level. In the form of a collection of published articles. 2009, 56 pp.

Cat. no. 7.00010 ISBN 0-88698-252-9
Print $15
E-Book $13
Print + E-Book $25

ORDER ONLINE at petex.utexas.edu/publications or EMAIL: info@petex.utexas.edu
GENERAL INDUSTRY

A Dictionary for the Oil and Gas Industry, 2nd ed.
A reliable resource of over 12,000 definitions of terms used throughout the oil and gas industry. Illustrated, easy to use. Includes industry associations, key government agencies, lists of common abbreviations, SI units, and metric equivalents. 2011, 336 pp.
Cat. no. 1.35020 ISBN 0-88698-240-5
Print $99
E-Book $88
Print + E-Book $114

Fundamental Principles of Gas Turbines
Straightforward explanations of how gas turbines operate, why each section and component is needed, and how to maintain turbine equipment properly. 1980, 88 pp.
Cat. no. 1.76010 ISBN 0-88698-147-6
Print $26

Fundamental Principles of Gas Turbines Workbook
 Supplements Fundamental Principles of Gas Turbines book
Consists of three segments addressing chapters in the textbook, beginning with a list of objectives and ending with test questions. 1981, 68 pp.
Cat. no. 1.76016 ISBN 0-88698-148-4
Print $20

An essential reference for all accounting and financial professionals as well as investors in today’s global energy industry. The book was produced in conjunction with leading international professional services firm PricewaterhouseCoopers LLP (PwC) and published by the Professional Development Institute at the University of North Texas. Helps provide petroleum accounting professionals with a reliable resource on current concepts and practices. 2011, 680 pp.
Cat. no. 1.00220 ISBN 978-0-88698-233-1
Print $76

EXPLORATION

Practical Petroleum Geology, 2nd ed.
From the perspective of a practicing petroleum geologist, this book describes geology in relation to the petroleum industry, discussing basic geological concepts, accumulation of hydrocarbons, exploration, economic examination, exploratory wells, and oil and gas recovery. 2014, 304 pp.
Cat. no. 1.00220 ISBN 978-0-88698-233-1
Print $76
E-Book $65
Print + E-Book $91

Practical Petroleum Geology Certificate Program
3.0 CEUs
This self-study training package includes an online assessment* (with 215 questions) and a copy of Practical Petroleum Geology (print or e-book). Earn a Certificate of Completion from the University of Texas at Austin—PETEX when you successfully finish this program. Est. time commitment: 30 hours.

Print book or e-book option available. The e-book allows bookmarking and searching; it is also accessible for people with disabilities.

DRILLING

A Primer of Oilwell Drilling, 7th ed.
Master the Basics of Oil and Gas Drilling
Developed with the entry-level driller in mind, discover why this full-color publication remains the mainstay of the oil and gas industry. Dr. Paul M. Bommer of the University of Texas at Austin breaks down each facet of the upstream sector with easy-to-read text, photos of equipment, and depictions of on- and offshore rig operations. Originally developed in partnership with the International Association of Drilling Contractors (IADC), this latest edition includes a comprehensive glossary and index for quick referencing. 2008, 264 pp. Receive a 20” x 24” full-color Rotary Rig and Its Components Poster when you purchase this title.

E-Books + Assessments $642

4-COLOR EDITION
Segment 1
Introduction to Rotary Drilling, 2nd ed.
Designed for industry personnel and petroleum technology students involved in rotary drilling operations. Revised by well-known drilling expert Dr. Robello Samuel with colorful images and updated explanations, this book covers the fundamentals of rotary drilling with a vibrant description of the rotary rig and its components, focusing on the mud system, the drill stem, and the bit. Explains the tools, instruments, and equipment required for drilling a well. Presented in an easy-to-read manner. 2014, 240 pp.
Cat. no. 2.01120 ISBN 978-0-88698-259-1

4-COLOR EDITION
Segment 2
Routine Drilling Operations, 2nd ed.
Describes routine operations on a drilling rig and the theory behind those operations. Contains information necessary for controlling well trajectories and examines the pieces of equipment, tools, and techniques used in the field to ensure that a hole stays on its planned path. In addition, this newly updated, full-color edition explores fishing operations and retrieval tools in great detail and looks at methods and devices used to prevent and control blowouts. Helps readers understand the procedures and calculations used in drilling fluids, hydraulics, and straight hole drilling. 2015, 304 pp.

The Drilling Supervisors Guide to Understanding and Maintaining Drilling Fluids
This guide covers virtually every aspect involved in understanding and maintaining drilling fluids. It is intended to give the drilling supervisor and the on-site mud engineer a thorough understanding of drilling mud. Clay and polymer chemistry are covered in detail. Calculations for engineering and maintaining the mud are presented in a clear and simple format. 2008, Drilbert Engineering, 350 pages.
Cat. no. E2.80220 ISBN 0-88698-221-9
Print $125

PETEX e-books make reading easy on your personal computer, tablet, or mobile device.
Practical Underbalanced Drilling and Workover
Renowned drilling expert Bill Rehm provides a detailed view of underbalanced drilling operations with terms, calculations, and guidelines. Covers surface control and downhole equipment, circulation, the fluid column, types of drilling, corrosion, and more. Based on the IADC accreditation requirements for underbalanced drilling. 2002, 204 pp.

Rig Math, 3rd ed.
This book presents an easy way to learn the math used in drilling. It is a highly visual approach that makes math extremely easy and intuitive. The visual approach is analogous to using a map to plot your course, rather than relying on a list of complicated instructions. The reader will learn to reason his or her way through any well control problem without using complicated equations or a kill sheet. It covers the hierarchy of operations in equations, use of scientific calculators, multiplying fractions with words, conversion factors, elementary algebra, well control math, and practical problem solving. 2003, Drilbert Engineering, 158 pp.
Cat. no. E2.80130 ISBN 978-0-97229-863-6

The Roughneck Training Handbook
This handy reference guide written by petroleum industry expert Ron Baker provides a clear, easy-to-understand explanation of the duties, instruments, and equipment for rotary helpers and floorhands (roughnecks) working on rig floors around the world. Presented with vibrant full-color photos and illustrations, this handbook should prove useful and informative for floorhands new to the oil and gas industry, as well as experienced rig workers interested in learning more about the pipe and pipe-handling equipment employed on the rig. Includes more than 75 full-color images, readability features, review questions, and an index and glossary. 2017, 184 pages.
Cat. no. 2.02010 ISBN 978-0-88698-274-4

Trouble Free Drilling, 3rd ed.
This book is intended to help drilling personnel improve their understanding of the downhole mechanics of drilling. The focus of this book is the physics of stuck pipe. The mechanics of what causes stuck pipe is explained in great detail. Warning signs, preventive measures, and various freeing procedures are also discussed. 4-color, hard cover edition. 2014, Drilbert Engineering, 306 pp.
Print $125

Essential Teaching Tool
The Rotary Rig and Its Components Poster
A detailed full-color, labeled illustration of the key equipment of a drilling rig. An effective instructional tool, the poster identifies key rig components. An attractive wall hanging available in four languages and suitable for framing. Print only. Try the Interactive Online Rig Tool for an e-learning perspective on the drilling rig. Visit petex.utexas.edu/elearning/modules to demo this and our other e-learning modules.

Rotary Drilling Series, Complete Set

An industry standard, this best-selling series comprises five units, each containing separately bound lessons. The units collectively cover a broad range of rotary drilling operations and technical information associated with each topic. Originally constructed in cooperation with the International Association of Drilling Contractors (IADC), Measurements are given in both U.S. and SI units. Price includes 10% off when all five units are purchased.

Lesson 1

Making Hole, 3rd ed., Revised
Covers the purpose and planning of a well using different types of bits. Describes why certain bits are selected. Also covers bit wear and tear and replacing bits as well as the effects of weight and rotary speed.

- Cat. no. 2.201300
  - Print $42
  - E-Book $36
  - Print + E-Book $57

Lesson 2

Drilling Fluids
This book takes on proper circulation to aid in understanding composition, properties of mud, water-base drilling muds, oil muds, effects of air, gas, and mist drilling, and various problems that can occur. Includes illustrations, summaries, review questions, and a glossary. 2000, 212 pp.

- Cat. no. 2.202100
  - Print $47
  - E-Book $40
  - Print + E-Book $62

Lesson 3

Drilling a Straight Hole, 4th ed.
Describes factors affecting hole deviation and methods of control. Explains the purpose of each tool in the bottomhole assembly and emphasizes how tools are selected and assembled for maximum effectiveness. Includes illustrations, summaries, review questions, and a glossary. 2015, 160 pp.

- Cat. no. 2.20340
  - Print $68
  - E-Book $58
  - Print + E-Book $83

Lesson 4

Casing and Cementing, 3rd ed.
Describes the concept of casing string design and procedures for properly handling pipe while it is on the rack, being picked up, made up into a string, and cemented in the hole. Covers types of pipe used and string design considerations, running techniques, cementing procedures, casing liner use, liner setting, and cement strength determination. Includes illustrations, summaries, review questions, and a glossary. 2001, 128 pp.

- Cat. no. 2.20430

ROTARY DRILLING SERIES, UNIT IV

Man Management and Rig Management

Provides an introduction to management skills for first-level supervisors in the petroleum industry. Eight lessons are presented in one clearly illustrated, easy-to-read volume:
1. What is Management?
2. What is Leadership?
3. How Do You Handle Personnel Problems?
4. How Do You Start Out a New Hand?
5. How Do You Train Employees?
6. Where Do You Fit into the Organization?
7. How Do You Plan and Organize Work?
8. How Can Work Be Done More Efficiently?

4-COLOR EDITION

Lesson 2
Spread Mooring Systems, 2nd ed.

For all offshore personnel familiar with drilling procedures on land, this full-color book describes the important role of spread moorings in the offshore drilling industry. Christopher Morlan, a marine structural engineer with SBM Atlantis’s Mobile Offshore Unit, offers basic historical and operational perspectives with enough technical depth to understand concepts. The text explains the main principles of mooring line behavior, anchor holding power, deployment and retrieval methods, and the specific challenges of staying on location above the well. Clearly and colorfully illustrated with a complete glossary, review questions, and answer key. 2009, 120 pp.
Cat. no. 2.50220 ISBN 978-0-88698-253-9

Lesson 4
Jacking Systems and Rig Moving Procedures

Provides an introduction to the different types of self-elevating offshore rigs, explaining how they are operated and transported. 1976, 52 pp.
Cat. no. 2.50410 ISBN 0-88698-072-0
Print $32
E-Book $27
Print + E-Book $47

4-COLOR EDITION

Lesson 5
Diving and Equipment, 3rd ed.

Introduces nondiving personnel to the procedures and equipment used in deep-sea diving operations. Updated by diving masters John Herren and Gene Lo Conte from Epic Divers & Marine, this edition provides a visual adventure into the undersea world of the commercial diver who services offshore rigs, platforms, and pipelines. Includes vibrant photos and illustrations, and review questions. 2010, 160 pp.
Cat. no. 2.50530 ISBN 978-0-88698-238-6
Print $68
E-Book $58
Print + E-Book $83

Lesson 6
Vessel Inspection and Maintenance

Creates an awareness of the importance of maintaining the drilling unit and its equipment to prolong service and ensure safe working conditions. 1977, 38 pp.
Cat. no. 2.50610 ISBN 0-88698-074-7
Print $32
E-Book $27
Print + E-Book $47

4-COLOR EDITION

Lesson 7
Helicopter Safety

Provides offshore personnel and visitors with a complete overview of routine and emergency travel safety on transport helicopters. Covers helicopter operation, helideck safety, boarding, emergency equipment, and cargo loading procedures. Also gives information about the knowledge and skills needed to react properly and survive helicopter ditching at sea.

ORDER ONLINE at petex.utexas.edu/publications or EMAIL: info@petex.utexas.edu
OFFSHORE

Helicopter Safety, cont.
Readers will learn crash and rescue procedures and understand what happens during underwater abandonment and rescue. Includes numerous full-color illustrations, summaries, review questions, and a glossary. 2007, 120 pp.
Cat. no. 2.507101 ISBN 0-88698-219-7
Print $68
E-Book $58
Print + E-Book $83

Lesson 8
Orientation for Offshore Crane Operations, 2nd ed.
Acquaints offshore personnel with the parts and functions of pedestal cranes, including prime movers and transmissions. Discusses wire rope and slings, safe load rigging and handling, safe hoisting procedures, and hand signals. 1997, 80 pp.
Cat. no. 2.50820 ISBN 0-88698-179-4
Print $42
E-Book $36
Print + E-Book $57

4-COLOR EDITION
Lesson 9
Life Offshore, 2nd ed.
Provides a comprehensive look at offshore facilities, work conditions, travel, and personal living conditions for new employees working offshore. Focuses on the global industry of offshore operations that relies on modern technology and drilling methods, understanding that living offshore remains a great challenge. Helps personnel become settled in their temporary offshore homes. Includes comprehensive summaries, and review questions. 2008, 92 pp.
Cat. no. 2.50920 ISBN 978-0-88698-220-1
Print $53
E-Book $45
Print + E-Book $68

Lesson 10
Marine Riser Systems and Subsea Blowout Preventers
Describes marine riser systems and subsea blowout preventers—how they operate, how they are used, and how to install them—on typical offshore floating rigs and explains the principles of basic well control. 2003, 204 pp.
Cat. no. 2.51010 ISBN 0-88698-188-3
Print $79
E-Book $67
Print + E-Book $94

WELL CONTROL

Describes the techniques and equipment used around the world, focusing on exploration, drilling, production, workover, and transportation. Ideal for anyone seeking fundamental information about offshore oil and gas operations. 1998, 132 pp.
Cat. no. 1.10030 ISBN 0-88698-178-6
Print $68
E-Book $58
Print + E-Book $83

Comprehensive Stability
Designed for offshore marine personnel working on jackups, semisubmersibles, and other MODUs. Teaches vessel stability concepts and covers onboard calculations, draft, hydrostatic properties, free surface effect, inclining experiment, center of gravity, center of buoyancy, and metacenter theory. Content meets standards required by IMO resolution A.891(21) of Comprehensive Stability Training. 2005, 152 pp.
Cat. no. 1.11010 ISBN 0-88698-214-6
Print $68
E-Book $58
Print + E-Book $83

Advanced Stability
For offshore drilling marine personnel such as master, mate, OIM, barge supervisor, and barge control operator. Covers the theory of stability up to and above the standard required by IMO resolution A.891(21). Topics include units of measurement, environmental forces, mooring systems, and ballast system, stability calculations, and construction design. (Recommended prerequisite: Comprehensive Stability) 2006, 136 pp.
Cat. no. 1.12010 ISBN 0-88698-215-4
Print $68
E-Book $58
Print + E-Book $83

Offshore Well Construction
For offshore drilling field personnel such as drillers, toolpushers, rig managers, and drilling engineers. Covers the complex process of evaluating and developing oil and gas reserves and the different disciplines involved. Discusses formation evaluation, rig equipment sizing, drilling problems, advanced drilling techniques, completion equipment, and other key topics. 2005, 288 pp.
Cat. no. 1.13010 ISBN 0-88698-216-2
Print $68
E-Book $58
Print + E-Book $83

Introduction to Well Control, 2nd ed.
Assists drilling crews with the basics of well control, taking a rig hand through fundamentals beginning with pressure concepts and moving through kick warning signs and blowout prevention. 1999, 112 pp.
Cat. no. 5.10020 ISBN 0-88698-185-9
Print $52
E-Book $44
Print + E-Book $67

Practical Well Control, 4th ed.
This book supports the International Association of Drilling Contractors (IADC) accreditation requirements. Includes hydrogen sulfide procedures, capacity tables, formulas for well-control calculations, and cross-references to regulations. 1998, 352 pp.
Cat. no. 2.80040 ISBN 0-88698-183-2
Print $75
E-Book $64
Print + E-Book $90

PETEX Rotary Drilling Series
The most complete lesson series available!

Artificial Lift

**Acoustic Fluid Level Measurements in Oil and Gas Wells Handbook**

A comprehensive technical handbook that discusses the importance, application, and interpretation of acoustic fluid level measurements for all types of wells and measurement instrumentation, ranging from strip charts to digital sensors. Using extensive graphics, numerous records and reports, and mathematical equations for sound waves, ideal gas properties, and gas or liquid flow rate, authors Dr. A.L. Podio and Jim McCoy describe a versatile, accurate, and cost-effective means of assessing and optimizing well performance and production. Also includes a discussion on equipment, best practices, and procedures for acquiring acoustic fluid level records in wells. Contains a detailed glossary and index. 2018, 372 pp.

Cat. no. 3.14010

Print $120  
E-Book $102  
Print + E-Book $135

**REVISED EDITION**

**The Beam Lift Handbook, Revised**

A comprehensive book that serves as both a field handbook and a textbook. Authors Dr. Paul M. Bommer and Dr. A.L. Podio of The University of Texas at Austin have outlined the goals and best practices for production beam lift systems. Using extensive graphics, illustrations, and mathematical equations, this one-of-a-kind technical manual fully covers the important aspects of beam lift systems and potential complications in daily operations. Includes a detailed glossary and index. 2015, 624 pp.

Cat. no. 3.130101

Print $120  
E-Book $102  
Print + E-Book $135

**FULL-COLOR POSTER**

**An Oil Lease and Its Components Poster**

Suitable for framing and shipped in a mailing tube, this full-color perspective drawing identifies components of a typical lease site and indicates fluid flow paths. A valuable aid for anyone wanting an overall illustrative view of a typical lease and bonus explanations of typical lease components. 2008, 32” × 21”.

Cat. no. 3.90120  
ISBN 0-88698-222-7

Print $37

**Petroleum Production Operations**

For lease operators and supervisors, this book covers well performance evaluation, primary cementing, perforating, squeeze cementing, packer and tubing forces, problem well analysis, workover methods and planning, and beam pumping. 1986, 172 pp.

Cat. no. 3.90210  
ISBN 0-88698-124-7

Print $37

**Treating Oilfield Emulsions, 4th ed.**

Covers emulsion theory, treating methods, treating equipment, cost control, and conservation of fuel and light ends. Also presents sampling and testing methods for sediment and water content. 1990, 116 pp.

Cat. no. 3.50040  
ISBN 0-88698-137-9

Print $42  
E-Book $36  
Print + E-Book $57

**FULL-COLOR WORKBOOK**

**Field Handling of Natural Gas—Volume 1 Certificate Program**

This self-study training package includes an online assessment* (with 150 questions) and a copy of Field Handling of Natural Gas—Volume 1 (print or e-book). Earn a Certificate of Completion from the University of Texas at Austin—PETEX when you successfully finish this program. Est. time commitment: 20 hours.

**Best Seller**

**Oil and Gas: The Production Story, 2nd ed.**

Tells the complete story of oil and gas from origin through production and distribution. Covers geology, exploration, drilling, reservoir drive mechanisms, artificial lift, testing, measurement, storage, and sale. Serves as a solid introduction to the PETEX Oil and Gas Production Series (see pg. 45). Also includes *An Oil Lease and Its Components* poster. 2008, 150 pp.

Cat. no. 3.90020  

Print $80  
E-Book $68  
Print + E-Book $95

**Natural Gas**

**Field Handling of Natural Gas, Vol. 1: Production and Conditioning**

Natural gas is considered an important and abundant source of clean energy. Gas facilities operated in the field are mainly used to condition the gas to make it marketable or to prepare it for further processing. These field facilities remove impurities, water, and excess hydrocarbon liquids.

Learn the basics of natural gas production and conditioning in a clear and easy-to-understand format. Industry experts J.C. Kuo and Dr. Pervaiz Nasir demonstrate how natural gas is transforming the future of energy. Includes full-color illustrations, photos, special reader features, a glossary, and index. **Note:** This book comprises updated, expanded content for the first six chapters of the original book, Field Handling of Natural Gas. It is meant for those who require deeper study of production and conditioning topics. 2014, 192 pp.

Cat. no. 3.100101

**PRODUCTION**

*Field Handling of Natural Gas, 4th ed.*
Covers natural gas production, natural gas and liquid separation, hydrates, dehydration, and measurement of natural gas and gas liquids. 1987, 192 pp.
Cat. no. 3.10040 ISBN 0-88698-127-1
Print $42
E-Book $36
Print + E-Book $57

*Field Handling of Natural Gas Workbook*
Supplements *Field Handling of Natural Gas, 4th ed.*
Divided into three segments, each with learning objectives and review questions. 1988, 46 pp.
Cat. no. 3.10046 ISBN 0-88698-182-4
Print $26

**FULL-COLOR EDITION**
*Plant Processing of Natural Gas, 2nd ed.*
Written by industry experts Dr. Doug Elliot, J.C. Kuo, and Dr. Pervaiz Nasir, this manual covers gas fundamentals, absorption, fractionation, dehydration, mercury removal, instrumentation, cryogenic liquefaction, nitrogen recovery, nitrogen rejection, gas and liquid separation, and sulfur recovery. 2008, 208 pp.
 Cat. no. 3.11020 ISBN 978-0-88698-223-2
Print $79
E-Book $67
Print + E-Book $94

**FULL-COLOR WORKBOOK**
*Plant Processing of Natural Gas Workbook*
Supplements *Plant Processing of Natural Gas, 2nd ed.*
Designed to help the learner understand and retain the material covered in the book. Learning objectives are stated and comprehensive self-study questions cover the main points in each chapter. 2019, 56 pp.
Cat. no. 3.100116 ISBN 0-88698-222-7
Print $30

**PUBLICATIONS**

**Liquefied Natural Gas**

*LNG: Basics of Liquefied Natural Gas*
Covers the liquefaction process, storage, transportation, and major equipment used in the manufacture of liquefied natural gas (LNG). Bridges the gap between public perceptions and industrial realities. Authored by LNG industry experts Dr. Stanley Huang and Dr. Chen-Hwa Chiu of Chevron Technology and Dr. Doug Elliot of Bechtel Corporation, who contributed both technical and hands-on experience to create this unique reference manual. 2007, 160 pp.
Cat. no. 3.12010 ISBN 0-88698-217-0
Print $100
E-Book $85
Print + E-Book $115

**Oil and Gas Production Series, Complete Set**
This series was reviewed by the subcommittee of the American Petroleum Institute (API) Advisory Committee for the School of Production Technology. 10% off when complete set is purchased.
Cat. no. 3.30010
Print $394

**Analysis for Well Completion**
Surveys standard analysis of several types of oilfield data affecting well completion. Describes the characteristics of reservoirs and their fluids, explains methods for gathering data on those characteristics, and discusses ways in which the data is interpreted. 1984, 108 pp.
Cat. no. 3.31110 ISBN 0-88698-084-4
Print $37

**Beam Pumping**
A concentrated study of the most-used form of artificial lift—beam pumping. Organized according to three major areas: surface equipment, subsurface equipment, and pumping installation and design. 1986, 116 pp.
Cat. no. 3.31310 ISBN 0-88698-123-9
Print $37
E-Book $31
Print + E-Book $52

**Cased-Hole Logging**
Introduces logging procedures used in cased wells. Provides background information on radioactive and atomic theory as it relates to cased-hole logging. Describes various types of radioactivity logs and their uses in cased-hole logging. 1981, 88 pp.
Cat. no. 3.30510 ISBN 0-88698-107-7
Print $37

**Coring and Core Analysis**
Describes coring operations and methods of core preservation, sampling, and preparation for analysis. Also covers core analysis including determining porosity, permeability, and saturation. 1984, 80 pp.
Cat. no. 3.30910 ISBN 0-88698-041-0
Print $37

**Corrosion Control**
Provides a basic understanding of the corrosion process and how to manage corrosion. Describes some common corroding agents and methods of detecting, measuring, and controlling corrosion, with special emphasis on cathodic protection. 1982, 88 pp.
Cat. no. 3.30110 ISBN 0-88698-110-7
Print $37
**Improved Recovery**

Describes the role of subsurface processes in U.S. oil production and provides a non-technical description of improved recovery methods that displace oil. Introduces four recovery methods—waterflooding, gas injection, chemical flooding, and thermal recovery—and evaluates their development and use. 1983, 134 pp.

Cat. no. 3.30810 ISBN 0-88698-044-5
Print $37
E-Book $31
Print + E-Book $52

**Open-Hole Logging**

Introduces open-hole logging procedures, beginning with basic rock properties and radioactivity principles as they relate to open-hole logging. Describes various types of electrical, acoustic, and radioactive surveys used in open-hole logging. 1981, 100 pp.

Cat. no. 3.30410 ISBN 0-88698-108-5
Print $37

**Reciprocating Gas Compressors**

Cat. no. 3.30210 ISBN 0-88698-119-0
Print $37
E-Book $31
Print + E-Book $52

**Well Cementing**

Describes primary and secondary cementing procedures and considerations in selecting and mixing cement for a particular job. Covers additives, special cements, and cementing equipment. 1983, 82 pp.

Cat. no. 3.30610 ISBN 0-88698-112-3
Print $37

**Wireline Operations**

Provides basic information about wireline operations from development through maintenance. Describes wireline equipment, diagnostic and troubleshooting operations, and completion and production maintenance operations. 1984, 92 pp.

Cat. no. 3.31010 ISBN 0-88698-043-7
Print $37

---

**Primer of Oil and Gas Measurement**

Introduces the basic procedures, standards, and instruments used in measurement. A reliable reference for new workers and a solid resource for all industry professionals. Produced in cooperation with the American Petroleum Institute (API). 1993, 184 pp.

Cat. no. 8.20010 ISBN 0-88698-160-0
Print $53
E-Book $45
Print + E-Book $68

**Primer of Oil and Gas Measurement Workbook**

Supplements *Primer of Oil and Gas Measurement*

Reinforces information presented in the *Primer of Oil and Gas Measurement* with lessons, a vocabulary list, and a set of questions. Answer sheets are included in the workbook, but can be omitted. 1994, 80 pp.

Print $26

**Quick Reference for Oil and Gas Measurement**

Pocket-sized handbook with helpful information to perform measurement tasks. Addresses the special requirements of oil and gas measurement and includes mathematical symbols and signs, measurement abbreviations, numerical prefixes, international system of units (SI), conversion tables, temperature conversion in degrees, and API gravity conversions. 2007, 32 pp.

Cat. no. 8.20020 ISBN 0-88698-218-9
Print $21
E-Book $18
Print + E-Book $36

**Gas and Liquid Measurement**

Covers fundamentals, head and turbine meters, and other types of meters, focusing on orifice devices for measuring gas flow rate. Includes auxiliary equipment, sampling, mass measurement, gas contracts, and unaccounted-for gas. 1993, 184 pp.

Cat. no. 8.20110 ISBN 0-88698-161-1
Print $63
E-Book $54
Print + E-Book $78

**Petroleum Engineering Data Analytics Certificate**

This Data Analytics graduate certificate is designed for the working petroleum engineer who wants to master the ability to use analytics on massive amounts of data to promote informed decision-making. Learn more here: https://executive.engr.utexas.edu/
WELL COMPLETION AND WORKOVER

A Primer of Oilwell Service, Workover, and Completion
Cat. no. 3.60110 ISBN 0-88698-175-1
Print $58
E-Book $49
Print + E-Book $73

Well Servicing and Workover Series, Complete Set
This series is made up of twelve lessons (separate books) designed to provide valuable information on various operations performed on a producing oilwell to restore production.

Set of Lessons 1–12. Price includes 10% off when entire unit is purchased.
Cat. no. 3.70000
Print $405

Lesson 1
Introduction to Oilwell Service and Workover, 2nd ed.
Introduces the subject of oilwell service and workover to new workers to aid in understanding well servicing operations and the impact on oilwell production. 1991, 116 pp.
Cat. no. 3.70120 ISBN 0-88698-150-6
Print $37

Lesson 2
Petroleum Geology and Reservoirs, 3rd ed.
Discover how geologists help companies find oil and gas deep underground and construct wells to bring hydrocarbons to the surface. This book covers the basics of petroleum geology, subsurface exploration techniques, and production optimization. Includes full-color illustrations, 100 review questions, an index, and a glossary. 2016, 272 pp.
Cat. no. 3.70230 ISBN 978-0-88698-275-1
Print $68
E-Book $58
Print + E-Book $83

Lesson 3
Well Logging Methods, 2nd ed.
Presents logging procedures used to drill or work over an oil or gas well. Reviews the development of electric and nuclear logs. 1991, 54 pp.
Cat. no. 3.70320 ISBN 0-88698-151-4
Print $37

Lesson 4
Well Completion Methods
Explains various completion methods and types of equipment. Reviews procedures used to bring in an oilwell. 1971, 52 pp.
Cat. no. 3.70410 ISBN 0-88698-060-7
Print $26

Lesson 5
Artificial Lift Methods, 2nd ed.
Author and artificial lift expert William Lane provides a current overview of lift technologies as a starting point for understanding artificial lift. Focuses on concepts more than performance envelopes as technological advancements continue. Even with new technologies, the concepts presented in this book will remain the foundation for the lift industry and the keys to providing energy for future generations. Covers the means of supplementing reservoir energy to raise fluids to the surface after a well ceases to flow. Because the vast majority of the hundreds of thousands of oilwells in the United States are produced by artificial lift, the practice must be made as efficient and reliable as possible. Fully illustrated with a glossary and index included. Self-test review questions help readers fully understand this subject. 2013, 184 pp.
Cat. no. 3.70520 ISBN 978-0-88698-258-4
Print $68
E-Book $58
Print + E-Book $83

Lesson 6
Production Rig Equipment
Covers production rig equipment and the machinery required to repair oil and gas wells on artificial lift and recondition them so they can continue producing. 1971, 48 pp.
Cat. no. 3.70610 ISBN 0-88698-062-3
Print $26

Lesson 7
Well Servicing and Repair
Cat. no. 3.70710 ISBN 0-88698-063-1
Print $26

Lesson 8
Well Cleanout and Repair Methods
Details cleanout and repair methods for reconditioning oil and gas wells. 1971, 32 pp.
Cat. no. 3.70810 ISBN 0-88698-064-X
Print $26

Lesson 9
Control of Formation Pressure
Explains and illustrates indications of a kick, methods of obtaining control, and types of blowout preventer equipment for servicing and workover jobs. 1971, 40 pp.
Cat. no. 3.70910 ISBN 0-88698-065-8
Print $26
E-Book $22
Print + E-Book $41

Lesson 10
Fishing Tools and Techniques
Describes fishing tools and techniques with particular emphasis on cased-hole fishing problems. 1971, 52 pp.
Cat. no. 3.71010 ISBN 0-88698-066-6
Print $26

Lesson 11
Well Stimulation Treatments, 2nd ed.
This book addresses well stimulation treatments frequently used to rejuvenate old or poorly producing wells. Author A. Richard Sinclair discusses effective stimulation techniques, new methods, and variables to consider in designing and implementing treatments. For those seeking fundamental knowledge of a widely publicized and discussed topic, especially as it relates to production in today’s shale plays. Self-test review questions included. 2012, 112 pp.
Cat. no. 3.71120 ISBN 978-0-88698-209-6
Print $58
E-Book $49
Print + E-Book $73

Lesson 12
Well Service and Workover Profitability, 2nd ed.
Presents ideas and techniques that help formulate a realistic approach to the economics of well service and workover operations. 1980, 32 pp.
Cat. no. 3.71220 ISBN 0-88698-210-3
Print $26
**PIPELINE**

*Introduction to the Oil Pipeline Industry, 3rd ed.*

Explains how pipelines move millions of barrels of crude oil and refined products daily in the United States. Reviews the history, development, and construction of petroleum pipelines. Discusses gathering oil from fields, operating pump stations, controlling oil movement, maintaining pipelines, and pipelining products. Also includes environmental considerations, rules and regulations, and a glossary. Sponsored by the American Petroleum Institute (API) Transportation Department. 1984, 112 pp.

Cat. no. 4.10030 ISBN 0-88698-093-3

Print $37

**Oil Pipeline Construction and Maintenance, 2nd ed.**

For persons new to the pipeline industry or for those seeking fundamental information, this book covers economic planning, principles of liquid flow, design and specifications, construction, materials, maintenance, and corrosion control. A valuable instructional tool to understand the operation of vast miles of pipeline and what it takes to build and maintain this valuable means of round-the-clock transport. 1973, 164 pp.

Cat. no. 4.22020 ISBN 0-88698-078-X

Print $26

**Pipe Line Construction, 3rd ed.**

Captures the history of the pipeline industry and its technological innovations. Covers modern pipeline construction from clearing right-of-ways to testing the completed pipeline. Also discusses specialty construction involving river crossings, swamps, and marshes, laying pipe offshore, and Arctic construction. Includes a glossary and a full-color, folded poster of a pipeline spread. Sponsored by the Pipe Line Contractors Association. 1984, 129 color illustrations, 122 pp.

Cat. no. 4.00030 ISBN 0-88698-096-8

Print $42

**Pipe Line Construction Poster**

Full-color poster of a pipeline spread. Suitable for framing. 1984. 11” × 32”.

Cat. no. 4.00130

$16

**H₂S Safety Handbook, 2nd ed.**

Pocket-sized quick guide to general hydrogen sulfide (H₂S) safety procedures. Covers the sources and properties of H₂S, its hazards, how to detect the gas, the symptoms of H₂S exposure, and procedures for exposed workers, as well as types of protection and apparatus to ensure safety. 2008, 24 pp.

Cat. no. 2.73020 ISBN 0-88698-224-3

Print $16

E-Book $14

Print + E-Book $26

**SAFETY**

**4-COLOR EDITION**

**RDS Unit I, Lesson 10**

**Safety on the Rig, 4th ed., Revised**

Reviews readiness and prevention of hazardous situations. Focusing on the importance of safety on any rig, this lesson covers safe transportation to and from a rig, hand- and power-tool safety, rig operations and equipment, first aid, and proper response to emergencies. Includes 4-color illustrations, summaries, review questions, and a glossary. 2014, 232 pp.

Cat. no. 2.110401 ISBN 978-0-88698-186-0

Print $52

E-Book $44

**RDS Unit V, Lesson 7**

**Helicopter Safety**

Provides offshore personnel and visitors with a complete overview of routine and emergency travel safety on transport helicopters. Covers helicopter operation, helideck safety, boarding, emergency equipment, and cargo loading procedures. Also gives information about the knowledge and skills needed to react properly and survive helicopter ditching at sea. Readers will learn crash and rescue procedures and understand what happens during underwater abandonment and rescue. Includes numerous full-color illustrations, summaries, review questions, and a glossary. 2007, 120 pp.

Texas Engineering Executive Education (TxEEE) provides working engineers with accessible, applicable, real-world learning opportunities through individual course offerings, executive master’s degree programs, professional development courses, and custom courses.

TxEEE’s two-year master’s degree programs provide the unique opportunity to obtain your degree while working full-time. Classes meet one weekend a month or are offered 100% online.

- Engineering Management
- Mechanical Engineering
- Software Engineering

TxEEE also offers professional development that provides results-based learning and continuing education units (CEUs) for busy engineers. Short courses, workshops, and online learning are available for the latest in software and technology engineering; engineering business and leadership; civil, environmental, and petroleum engineering; emerging technologies; and operational excellence.

Visit us online at executive.engr.utexas.edu

The Health and Safety Training Center (HSTC) at The University of Texas at Austin provides safety and health compliance training to the Texas mining industry as the Mine Safety and Health Administration (MSHA) State Grant recipient of Texas.

The Health and Safety Training Center is responsible for providing safety and health training and a variety of other services to improve the conditions of mine safety and health within Texas. The program includes training for:

- MSHA Mine Safety Compliance and Certification Training
- Occupational Safety and Health Administration (OSHA) compliance
- Electrical Safety
- Certification Exam Prep for safety professionals
- Expanded First Aid/CPR offerings

HSTC is working to prevent on-the-job injuries, accidents and fatalities in Texas, the United States, and internationally with training relevant for all industries.

Call for Instructors

PETEX invites experts in the oil and gas industry to submit résumés for our contract instructor positions. Share your industry knowledge by providing engaging classroom and hands-on instruction.

Candidates who wish to teach must be comfortable presenting to industry professionals in both an online and in-person classroom setting. Previous experience teaching is preferred but not required. Submit your résumé to HTC@petex.utexas.edu for consideration. Selected candidates will be contacted by email. Primary training location is in Houston, Texas. Other locations may be possible.
